

Fuel Surcharge Report

March 2026

The average UK pump price for diesel fell within the 139.51 - 142.00 surcharge band during February 2026.

In accordance with our fuel surcharge calculator, our fuel surcharge will therefore be reduced to 15.0% with effect from Monday, 9 March 2026.

Fuel surcharges have been necessary to cope with fluctuations in the price of diesel and whilst we appreciate that such charges are never welcome, we do try to ensure that our charges are competitive and transparent. We use reliable and trusted sources such as the Department for Business, Energy & Industrial Strategy to establish average UK pump prices.

Please note that cycle courier and eCargo trike services benefit from a 0% fuel surcharge. To find out more about our zero emission courier services please visit www.priorityexpress.co.uk/zero or contact your local customer services team.
