

IDECO VALUE STACK

Adding flexibility and valuable features
to your Idemia Biometric solution.

CONTENTS

MORPHOMANAGER BIOBRIDGE

IDECO RMS

IOT CONNECT

MULTI DOOR TRIGGER

TAMPER DETECT SECURE RELAY

User record synchronisation from external systems into MorphoManager

BENEFITS

- Simplified BioBridge integration for unsupported systems.
- Integrate biometric capability into ACS or other business systems.
- Easy popup enrol client to streamline and simplify Biometric capture process.

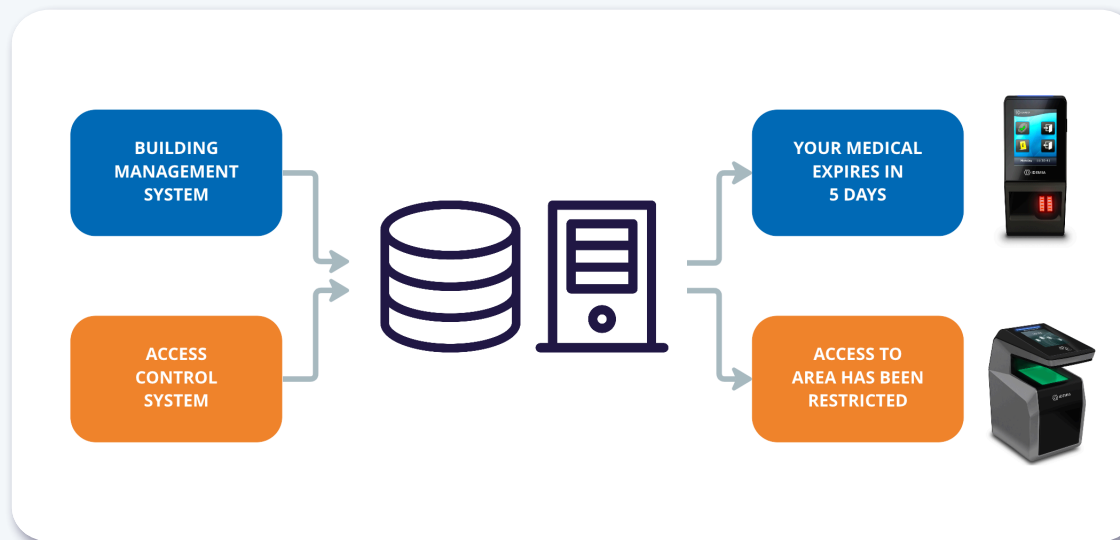

COMPATIBILITY

- WINDOWS 8 OR GREATER
- MORPHOMANAGER V15 AND LATER
- SUPPORTS ENTIRE IDEMIA RANGE OF ACCESS & T&A DEVICES

Remote Message and Event Server for IDEMIA devices Enables real-time custom user message sending to IDEMIA devices

BENEFITS

- Facilitates message-sending to biometric device displays.
- Custom messages can be set per user.
- Capture Tamper, fake finger duress or any other events in real-time.
- Allows one or multiple organisational systems to interface to the device messaging platform.
- Unlock an informed & safer work environment.
- Reduce operational costs with relevant and timely reminders.
- Deliver a friendlier visitor experience.
- Enables use of secondary response server for redundancy in mission critical applications .
- Easy integration allows external systems to interface using Web API or SQL.

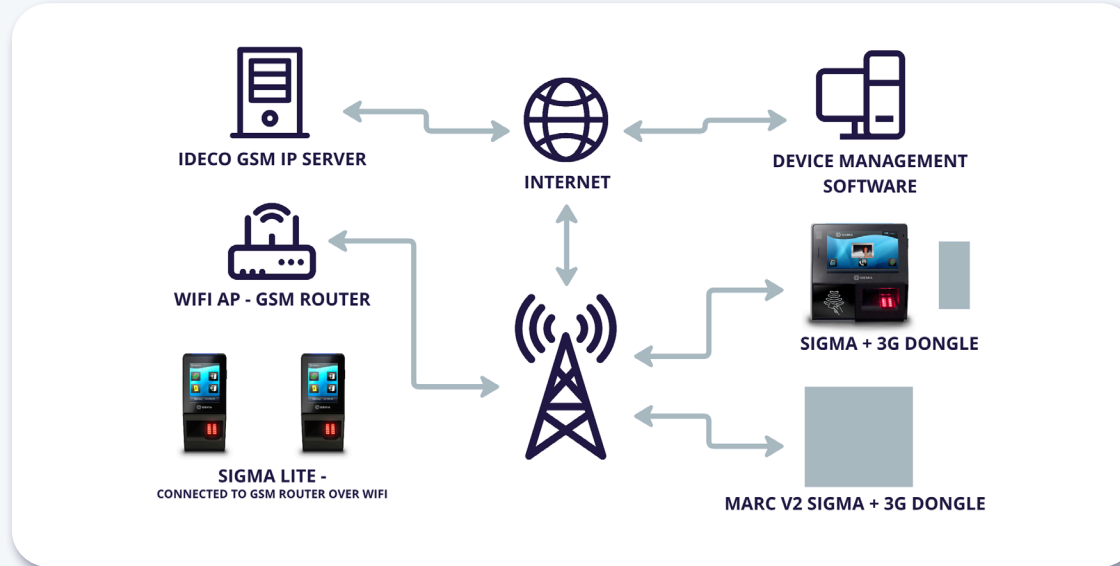

COMPATIBILITY

- COMPATIBLE WITH ANY IDEMIA ACCESS / T&A SOLUTION REGARDLESS OF DEVICE MANAGEMENT SOFTWARE USED
- SUPPORT FOR LEGACY MA5XX RANGE ON OLDER VERSIONS
- SUPPORTS ENTIRE SIGMA RANGE, WAVE RANGE, VISIONPASS RANGE
- WINDOWS 8 OR GREATER

Allows connecting to a remote biometric device over the internet

BENEFITS

- Connect remote IDEMIA terminals with GSM dongles or Routers.
- Maintains a register of dynamically allocated IP addresses.
- Serve the IP, Port and AIP information to authorised client stations.
- Maintains device configuration updates to maintain security and optimal connectivity.
- Maintains lists of authorised Hosts that can access a device.

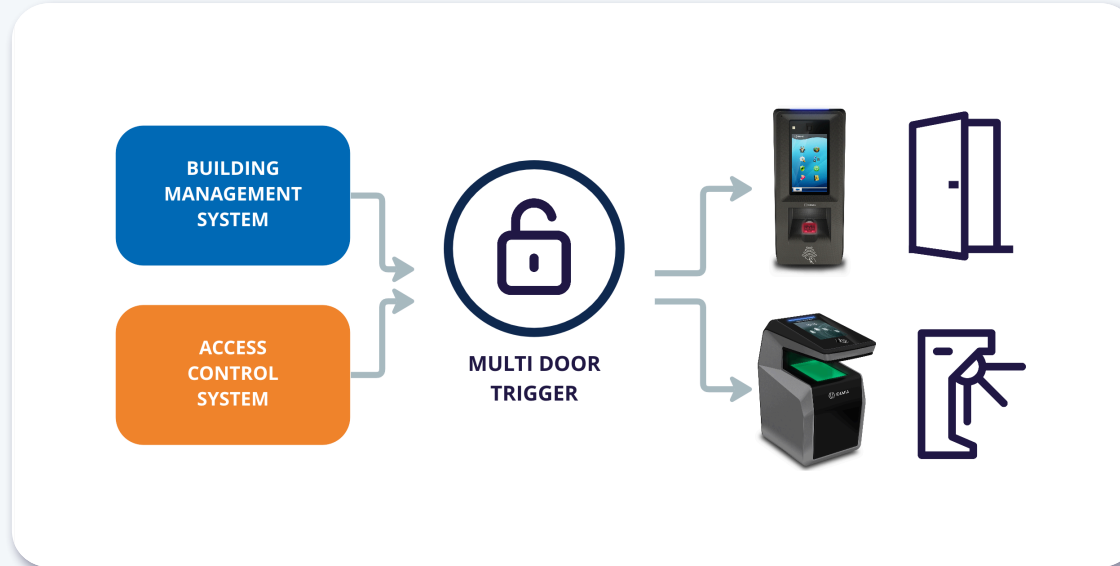

COMPATIBILITY

- COMPATIBLE WITH ANY IDEMIA ACCESS / T&A SOLUTION REGARDLESS OF DEVICE MANAGEMENT SOFTWARE USED
- SUPPORTS ENTIRE SIGMA RANGE, WAVE RANGE, VISIONPASS RANGE
- WINDOWS 8 OR GREATER

Allows unlocking multiple doors/gates from a central point
Helps with rapid area/facility evacuation and/or access

BENEFITS

- Quick access dashboard included for monitoring and testing system.
- Compatible with MA5g range (Sigma, Sigma Lite, Sigma Extreme, Wave, VisionPass).
- Supports MA5G solutions that makes use of local device relay to open door.
- Can be deployed on multiple hosts for redundancy.
- Optionally change device wallpaper image with unlock notification.
- External "exe" call allows one or more organisational systems to send door trigger.
- Quick installation and simple configuration.
- Fully configurable Retry loop for failed devices.

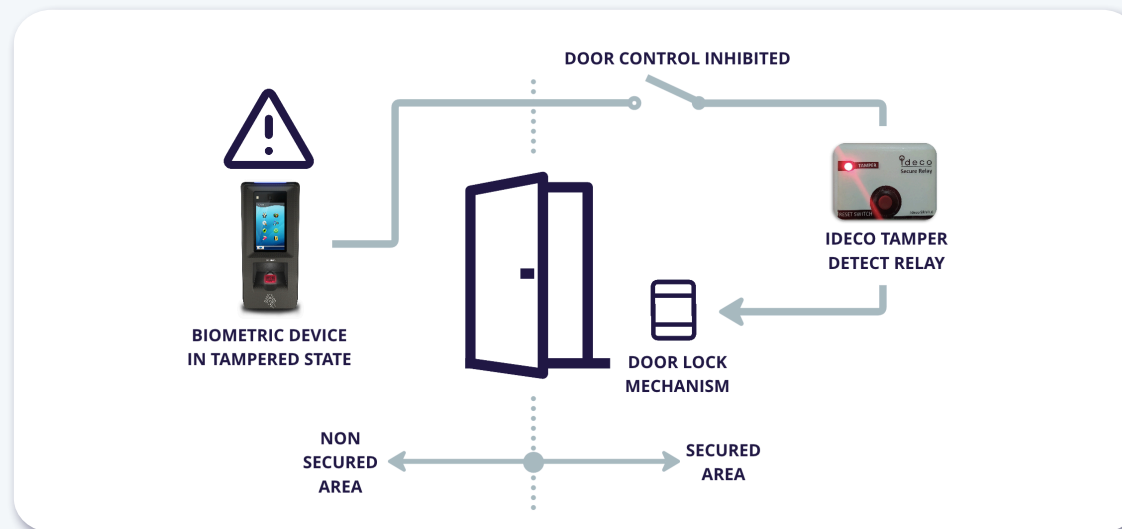

COMPATIBILITY

- COMPATIBLE WITH MA5G RANGE (SIGMA, SIGMA LITE, SIGMA EXTREME, WAVE COMPACT, VISIONPASS)
- SUPPORTS MA5G SOLUTIONS THAT MAKES USE OF LOCAL DEVICE RELAY TO OPEN DOOR

Provides an inexpensive means to secure the door control from tamper access in IDEM-IA biometric devices used to control the door lock mechanism directly (SDAC mode)

BENEFITS

- LED and Buzzer notification when tamper is triggered.
- Simple and cost effective “safe side” relay for Biometric device.
- Locks door control on tamper detection.
- Quick and Easy installation.
- No additional software or backend required.
- Simple and cost effective way of adding a higher level of security.

COMPATIBILITY

- COMPATIBLE WITH THE LEGACY (MORPHO, SAGEM) AND NEW RANGES OF IDEMIA ACCESS CONTROL DEVICES.
