

Company Profile: WhereverSIM

WhereverSIM is one of the leading independent providers of secure and reliable M2M solutions. Based in Hamburg, the company supports enterprises around the world in implementing demanding IoT projects – drawing on its many years of experience, technical expertise, and strong consulting capabilities. The core business is the provision of M2M SIM cards that enable IoT devices to transmit data via the strongest available local mobile network at any location. This offering is complemented by a powerful online platform for SIM management and tailored data plans, ranging from just a few kilobytes to several hundred gigabytes per month.

Technological Scalability

WhereverSIM's solutions scale quickly – from a handful of SIM cards in pilot projects to tens of thousands in full-scale commercial operations. To date, more than 1,300 IoT projects have been successfully implemented worldwide using WhereverSIM's M2M SIM cards, with several million SIM cards managed via the platform.

IoT Connectivity for All Industries

The SIM cards are used across a wide range of industries, including e-mobility, agriculture, healthcare, logistics, digital signage, and building automation. They ensure stable, location-independent real-time data transmission, thereby enabling the automation of processes and the realization of connected business models. Customers include companies such as Ingram Micro, Viessmann, HP, Mer, HORSCH, SEAT MO, dm, and Tchibo
