

APEVIA COSMOS SOLID LED FAN — CONNECTION GUIDE

1. DAISY-CHAIN THE FANS

Connect each fan's **large 4-pin male_ female connector** to the next fan in series.

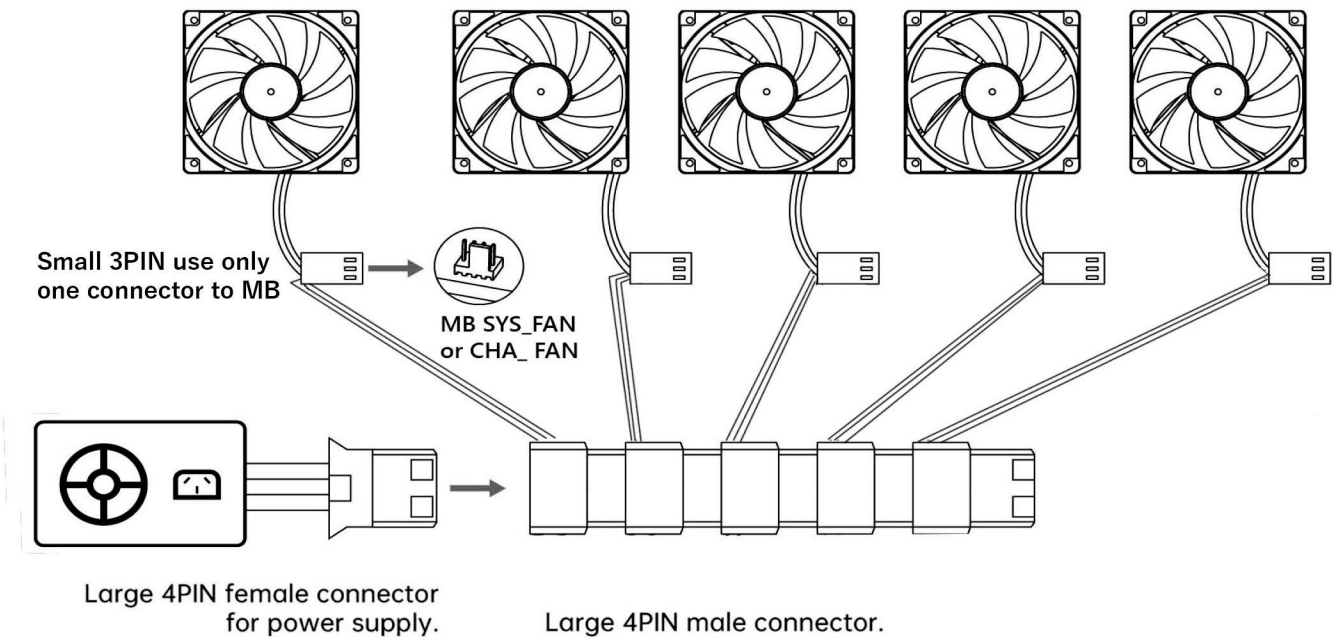

2. CHOOSE ONE CONNECTION METHOD

- A — **PSU POWER:** Connect the chain's large 4-pin female connector to the power supply.
- B — **MOTHERBOARD:** Connect the small 3-pin connector to **SYS_FAN** or **CHA_FAN**.

■ **IMPORTANT:** Use **ONLY ONE** method above. Do not connect the PSU power connection and motherboard 3-pin connection simultaneously.

CONNECTION DIAGRAM

Fan-to-fan connections are shown below. Select either the PSU power path or the motherboard control path.

CONNECTOR	FUNCTION
Large 4-pin male / female	Fan daisy-chain + PSU power
Small 3-pin	Motherboard SYS_FAN / CHA_FAN control

Before powering on: Verify every connector is fully seated and secure.
