Methodology

Interview Dates   June 14th – June 15th, 2025

Target Population   National registered voters

Sampling Method   The survey employed a dual-mode random sample of the national voter file. A stratified random draw of mobile phone numbers was split into:

70 % SMS text-to-web invitations, directing respondents to a secure online questionnaire.

30 % live interviewer calls to mobile phones.

Sampling strata were defined by region, party, gender, age, 2024 vote, and education to ensure geographic and demographic coverage.

Weighting   The sample was weighted based on gender, age, college education, party self ID, race, 2024 Presidential vote, region, and election participation.

Weighting targets were derived from a national voter file appended with consumer data and informed by analysis of the 2024 presidential election to accurately reflect the demographics of registered voters.

Number of respondents   n 1000 registered voters
subgroup: **n ≈ 450 self-identified 2024 Trump voters**

Margin of error   **Overall Sample**
± 3.2 % for RVs (95 % CL, design-adjusted)
Trump 2024 sample
± 4.8 % for RVs (95 % CL, design-adjusted)

Survey Modes   30% live interview via cell phone & 70% SMS text to web
