

Tangam – AI Assistant & Reporting

Tangam AI Assistant & Reporting enables users to ask questions and instantly receive answers, visualizations, and insights powered by Tangam's operational gaming intelligence platform.

AI Assistant

Designed to simplify reporting, troubleshooting, and operational analysis with natural-language access to operational, player, and financial insights.

Tangam AI is an interaction and reporting layer within SODA that helps casino leaders access and consume performance data faster. Executives can ask questions in natural language, receive answers supported by charts and reports, and automate stakeholder reporting using Tangam's unified operational, player, and financial data across all gaming assets.

Conversational Analytics

Natural-language access to operational, player, and financial insights.

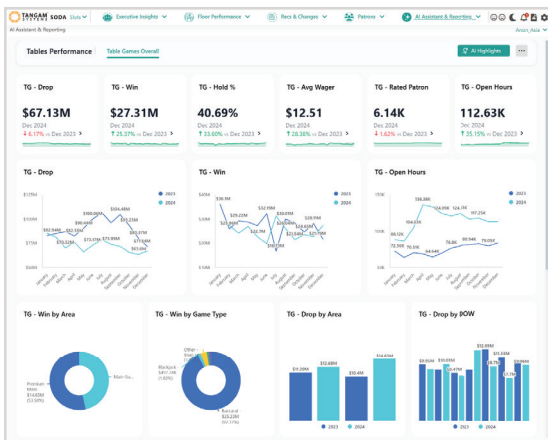

Custom Reporting & Scheduling

Create tailored dashboards and reports that can be shared or scheduled for delivery to stakeholders.

Data Integration

Connects directly to gaming data hosted within Tangam's SODA platform.

Automated Reporting

Tangam Automated Reporting enables creating, scheduling, and distributing analytical and executive reports automatically, reducing manual effort and improving consistency across stakeholders.

- Automate recurring financial, operational, and patron reports
- Integrated quick analysis tools such as AI Assistant (ask any chart), AI Highlights, or Change Analysis
- Schedule reports for automatic delivery to defined stakeholders
- Reduce manual report preparation and distribution effort
- Create customized dashboards and reporting views within SODA

Why Tangam AI Assistant?

Gaming-Centric

Built on Tangam's governed gaming datasets and KPI definitions to deliver answers that are relevant, consistent, and easy to validate.

Privacy First

Customer data is not hosted, stored, or used to train the underlying LLM. Only the relevant context needed to answer each question is processed.

Seamless Integration

Works within the existing Tangam platform, providing immediate access to natural-language search and AI-powered reporting.

NEW

Slots + Tables Analytics

Maximize gaming performance with comprehensive visibility into property-wide and patron-level performance through a unified data platform.
