

SP901E Signal Amplifier operating instructions

1. Features:

1. DC5V~24V wide range of working voltage;
2. Compatible with all kinds of 5V-TTL signal;
3. Can be cascaded with multiple amplifiers;
4. Size:5.45*2.83*1.09"
5. Certification:UL
6. Warranty:5 years

2.Wire Connection:

3.Caution:

- 1.The input and output voltages are the same, if customer's LED is not compatible with the output voltage , customer need to power the LED separately and connect the negative electrode to the amplifier's GND;
2. The current through the amplifier is limited ,when the consumption current is huge, customer need to increase power supply additionally.
