

BAM

Introducing BAM (Bonding Adhesive Material), the revolutionary eco-friendly liquid bonding agent designed for use with spray injection pothole patchers. Engineered for durability and performance, BAM offers a sustainable solution to one of the most persistent challenges in road maintenance. Made from hydrocarbon resins that meet ANSI / NSF 61 Standards, BAM is safe for contact with drinking water, eliminating runoff concerns to rivers, streams, or lakes.

BENEFITS

- Ready-to-use, no heating required
- Application with BAM last up to 10 times longer than conventional pothole repairs
- Ideal for rural road shoulder repair
- Stockpile Patch Mix. BAM can be mixed with rock for a high-performance, low-cost pothole patch mix which can also be utilized in throw-and-roll applications
- BAM is non-clogging and non-settling, ensuring easy application.
- Use of BAM allows immediate traffic for minimal disruption to road users.
