Attractions.io

Live Ride Updates

Counteract the leading cause of frustration in your guests journey by providing accurate ride updates that help guests beat the queues and squeeze more rides into their day. Operators benefit from easy ride monitoring tools that enable proactive downtime management.

Queue Times

The Spinners	2 min walk	5 mins
Cobra	4 min walk	5 mins
Cobra	7 min walk	15 mins
Hang Time	3 min walk	20 mins
Wooden Warrior	4 min walk	30 mins
Rocket Roller	4 min walk	35 mins
Crazy Mouse	2 min walk	35 mins
Yellow Python	4 min walk	40 mins

9:41
Friday, July 17th

Provide real-time updates

Share live queue times so guests can choose the best time to ride, and unlock new revenue streams by sending messages promoting passes.

Manage downtime

Give guests a heads up in advance, notifying guests of ride closures and set a custom status message to them informed.

Make data-driven decisions

Monitor wait times, ride utilisation and analyse feedback based on how long guests have waited in the Attractions.io management console.

Knoebels opted for Attractions.io's core solution, which comprises interactive wayfinding, real-time messaging and itinerary planning, and added Attractions.io's queue management system to help guests beat the lines.

We're proud to have delivered their branded mobile app in just 8 weeks, in-time for their start of the season.

"The guest experience is paramount to our operation, and we feel confident that the new app will help our guests make the most of their visit. Itinerary planning, entertainment schedules, ride queue times, exclusive offers and wayfinding are just a few of the perks our guests can look forward to experiencing."

Mary Helwig, Director of Marketing and Advertising, Knoebels Amusement Resort
