

EXPERIENCE

Smartsheet | Senior Product Designer II

2021 - Present

I led the product design for Smartsheet Portfolios, a brand new product for project portfolio management. Following its May launch, Portfolios realized our vision to empower portfolio managers with simple tools for standardizing projects and measuring performance with powerful reporting. Additionally, I envisioned a reimaged experience for Smartsheet Reports, simplifying report creation and optimizing key features: grouping and summaries. I also designed for Control Center, Smartsheet’s legacy project portfolio management tool adding new self-service abilities, integrations, and resolving experience paper cuts.

Kodak Alaris | Visual UI Designer

2016 - 2021

Collaborating on 5 products for desktop, web, and touchscreen kiosks. Gathering research, defining visual design, creating user flows, making prototypes, writing and overseeing usability tests, contributing to the design system and design QA.

Freelance | Design and Photography

2015 - 2016

Created a marketing website for a local startup, shot commercial food and portrait photography, designed emails, and crafted a website and branding for a small non-profit.

eCampus.com | Junior Graphic Designer

2013 - 2015

Created print materials like banners, posters, and postcards as well as graphics for social media, email campaigns, and online ads. Redesigned and rebranded an internal web app.
