PROFILE

iOS and Full Stack Engineer at One Medical (Amazon), with experience across fintech, health tech and other industries. Passionate about building products that make a meaningful impact, I combine creative and technical problem-solving with a user-first approach. My background in psychology enhances my ability to design intuitive, human-centered solutions. Always eager to learn new languages, tools, and technologies.

EDUCATION

FULL STACK WEB DEVELOPMENT

Flatiron School
2018

B.A. IN PSYCHOLOGY

California Baptist University
2012 - 2016

SKILLS

PROFESSIONAL

SwiftUI
Swift
Ruby
Rails
JavaScript
Technical Project Planning

WORK EXPERIENCE

SOFTWARE ENGINEER (iOS + Web)

One Medical (Amazon) | June 2022 - Present

Worked on multiple features throughout the iOS app, backend, and web front-end enabling and enhancing the user experience when managing their health needs.

SENIOR SOFTWARE ENGINEER

Stitch Fix | Oct 2019 - Apr 2022

Part of the warehouse engineering team, building applications to track the lifecycle of inventory across multiple warehouses and help make inventory available to clients. Team managed a large domain including web and iOS apps, services, and gems in Rails, Ruby, JavaScript, Go, and Swift.

FULL STACK WEB DEVELOPER

Formula Folios | Aug 2018 - Oct 2019

Built web application for both the marketing and trading teams to rebalance and manage client's portfolios.

RECOMMENDATIONS

Peer feedback

Jamie finds joy in the problems that she needs to solve in her role, which enables her to be continuously learning and delivering. She's able to take on the same type of tasks as senior engineers and clarify effectively with stakeholders to ensure accuracy of expectations.

Jamie possesses the exceptional ability to dissect intricate problems into lucid, actionable solutions, with a meticulous attention to detail. She breaks down challenges, providing clarity and precision that distinguishes him as a truly impactful software engineer.

Jamie provides thoughtful feedback on pull requests and is always willing to take on whatever tasks are needed. Jamie is willing to lend a hand and seeks help when needed.

Jamie throws herself at every problem with tenacity. She always shows enthusiasm for stepping out of her comfort zone and learning from others.

Jamie's super power is her ability to pioneer cutting-edge technology while maintaining a relentless focus on timely delivery. She worked on spearheading the integration of an LLM chatbot to bring significant innovation in our patient facing apps. Jamie consistently delivers her own features on schedule and proactively supports team members through timely code reviews.

Jamie's superpowers include empathy and collaboration. She has an amazing sense of understanding a problem, understanding it, and gathering input from others.

One of Jamie's greatest powers is that she handles feedback better than anyone else I know by questioning it but also being open to new ideas. After an interaction, she always comes out smarter and more knowledgeable about best practices and teaches the rest of the team. She also has full-stack knowledge and tends to be our domain expert (such as for Secure Messaging) both on iOS and backend.
