BlackRock LifePath Target Date Fund 2055

A sub-fund of BlackRock Investment Funds

Class S Accumulating GBP

ISIN: GB00BRTCQM93

Manager: BlackRock Fund Managers Limited

Objectives and Investment Policy

- ▶ The Fund aims to achieve a return on your investment (generated through an increase in the value of the assets held by the Fund and/or income received from those assets) for investors planning to retire between 2053 and 2057 by investing primarily in other funds and changing its asset mix over time, whilst incorporating certain environmental, social and governance (ESG) commitments (as described below)
- ▶ The Fund intends to gain indirect exposure globally to equity securities (e.g. shares), fixed income (FI) securities (such as bonds) and alternative assets (such as property and commodities) by investing at least 70% of its total assets in other funds. The Fund may also invest directly in equity securities, FI securities, MMIs (i.e. debt securities with short-term maturities), deposits and cash.
- ▶ The Fund's investment manager (IM) may use derivatives (i.e. investments the prices of which are based on one or more underlying assets) to help achieve the Fund's investment objective, or for efficient portfolio management purposes (EPM) (i.e. to reduce risk or costs within the Fund's portfolio or generate additional income). The Fund may engage in short-term secured lending of its investments to certain eligible third parties to generate additional income and off-set costs.
- ▶ The Fund's asset mix will be gradually adjusted to become more conservative as it approaches its maturity date, moving from generally higher risk (equities) to lower risk (FI) investments. The maturity date of the fund is 30 June 2055. The Fund will adjust its investment strategy to be more conservative to risk as it progresses towards its maturity date, from a portfolio of units of funds which gain exposure to approximately 55% equity securities (which are generally considered to be more risky compared to fixed income securities), towards a target portfolio composition on maturity of units of funds which gain exposure to approximately 50%-70% fixed income securities (which are generally considered to be less risky compared to equity securities) and 30%-50% equity securities.
- ▶ The Fund applies an ESG commitment to its selection of other funds: (i) at least 80% of the assets the Fund invests in government bond funds must be invested in funds that track benchmark indices comprised of at least 50% of government bond issuers with an ESG government rating of BB or higher (as defined by MSCI or another data vendor); and (ii) at least 80% of the assets the Fund invests in funds, other than government bond funds, commodity funds or funds used for EPM purposes, must be in funds that apply ESG criteria within their investment processes (as detailed in the Fund's prospectus). The IM will monitor the application of this commitment by measuring the ESG score and the carbon emission intensity score of the Fund's portfolio, by reference to the underlying issuers in which the Fund invests (whether through other funds or directly), including by comparison with a notional portfolio that represents the Fund's investment universe but does not apply ESG criteria. Quarterly reporting of these scores is made available to unitholders on request.
- ▶ The Fund is actively managed and the IM has discretion to select the Fund's investments. The Fund invests in funds, FI securities, equity securities and derivatives and so the value of your investment may be affected by the factors which impact the value of those assets.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your units will be accumulating units (i.e. dividend income will be included in their value).
- ▶ Your units will be denominated in Sterling, the Fund's base currency.
- ▶ You can buy and sell your units daily. The minimum initial investment for this unit class is £50,000,000.

Risk and Reward Profile

- ▶ The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated five due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - Changes to interest rates, credit risk and/or issuer defaults will have a significant impact on the performance of fixed income securities. Non-investment grade fixed income securities can be more sensitive to changes in these risks than higher rated fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- The Fund may seek to exclude Funds which are not subject to ESG-related requirements. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund's investments compared to a fund without such screening.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
 - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
 - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 31 December 2025. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.
