Toolio

Build vs. Buy: Why Leading Retailers Choose Toolio

Why choose Toolio?

Building in-house can feel strategic, but it often drains capital, slows time-to-impact, and shifts focus away from retail. Toolio delivers a flexible, purpose-built platform that's easy for planners to adopt, delivers measurable value in weeks, and scales seamlessly with your business.

You get modern usability and predictable costs, without the hidden burden of building and maintaining your own system.

The Toolio Advantage

	Toolio	In-House Solution
Time to Value	✓ Fast, phased rollout in weeks, not months, with hands-on support. Quick time-to-value.	9–18 months minimum before impact, with planners stuck in spreadsheets.
Cost	✓ Predictable, modular SaaS pricing with infra, upgrades, and support included.	Developer hours, infra, compliance, and ongoing costs add up and are unpredictable.
Purpose-Built for Retail	✓ Proven best-in-class workflows for OTB, assortment, and allocation from day one.	Teams code planning workflows from scatch, requiring IT bandwidth and delays in planning.
Scalability	✓ Flexes with your business, handling peak seasons and complex assortments with speed.	Custom tools struggle with peaks, surges, and large SKU counts.
Single Source of Truth	✓ Configurable ERP, POS, and e-commerce connectors give one trusted source of truth.	Custom feeds and Excel workarounds create silos and conflicting metrics.
