

PHOTO RESTORATION

Photo restoration and editing services restore faded, worn, stained, torn and cracked photos. Add or remove backgrounds, reconstruct missing image areas, remove unwanted people, or colorize black & white. Allow 5 working days for restoration plus current lab turnaround for scanning and printing. Add 50% for a 2-day rush. Price does not include scanning of originals or prints of your restored image. For additional costs, see Flatbed Scans and explore our printing options.

Refer to our Photo Restoration Guide to estimate a restoration level. Detail areas include the face (especially eyes, teeth and ears), hands and feet. All levels include color enhancement.
