AGRI

Farming in our hearts, science in our heads.

A photograph of three people (two men and one woman) sitting around a wooden table in a bright room with large windows. They are looking at a laptop screen which displays a diagram with several blue triangles. The man on the left is wearing a blue shirt and a cap. The man in the middle is wearing a dark shirt. The woman on the right is wearing a light blue shirt.

Go neXt level.

Running a sheep enterprise means living with a lot of uncertainty. With neXtgen Agri in your corner, the tough calls feel a lot lighter. Partner with us and you'll never second-guess your ram team, your data, or your direction. Just great science and great people, giving you the confidence to make the big calls and know they're right.

A clear plan of action

neXtgen
AGRI
neXtSelect

This is the heart of what we do. Together we get clear on where you want your flock to go, then make sure every decision moves you there. We clarify your breeding objective, sharpen your flock policy, and build a neXtSelect custom index that takes the guesswork out of comparing rams. We keep it current as your flock and your goals evolve.

Ram team management

Your rams shape the next generation, so being intentional about selecting your ram team is worth getting right. We review it with you every year, retire the ones no longer suited to your goals, and guide your selection and purchasing so each new ram fits your direction. Every dollar you spend goes toward a flock that's genuinely improving.

Replacement ewe classing

neXtgen
AGRI
neXtRank

Make better ewe replacement choices, and your whole flock moves forward faster. We make sure it's built on evidence, not guesswork. Using a systematic, strategic approach, neXtRank levels the playing field, stripping out environmental factors so your ewes are compared fairly on genetic merit. You keep the ones that best suit your breeding objective, cull the underperformers, and trust that every ewe staying on has earned her place.

neXtRecord

Optimising your ewe flock using eID

Your mature ewes are the engine of the flock, and knowing which to keep and which to move on is where real gains are made. We help you make those calls with confidence. eID and neXtRecord do the quiet work in the background, capturing each ewe's performance year on year so the decisions rest on her track record, not a hunch. We handle the setup, the data collection, and the hardware, then hand it all back clean and ready to act on. You keep the ewes earning their place and cull the ones that aren't, building a flock that gets stronger every season.

Partnership pricing

We'll work with you to determine the best combination of services to suit your needs. Prices are GST exclusive and do not include any direct costs of travel or consumables used on your behalf.

Breeding ewe numbers (ewes to the ram older than one year)	<1000	1000-2000	2000-3500	3500-6000	6000+
Breeding objective, flock policy and neXtSelect index (reviewed annually) PLUS your choice of at least one of the services below.	\$500	\$750	\$1000	\$1250	\$1500
Ram team management (annual audits and selection)	\$1000	\$1250	\$1500	\$1750	\$2000
Replacement ewe selection using eID and neXtRank *	\$1000	\$1500	\$2000	\$2500	\$3000
Optimising your mature ewe flock with eID and neXtRank #	\$750	\$1000	\$1250	\$1500	\$1750

* Five traits included, further traits may incur additional charges

Additional hourly charges may be applied for on-farm recording and/or data-handling

A background photograph showing two men in dark jackets and caps standing in a field with sheep. The man on the left is leaning on a metal railing, and the man on the right is standing behind a wooden fence. Several sheep are visible in the foreground and middle ground. In the background, there is a large white building with multiple windows and a grassy field.
