

# The neXtgen Beef Producer

neXtgen  
AGRI

Farming in our hearts, science in our heads.

# Go neXt level.

We have designed our service offering so that you can adjust it to your needs and so that it works in with other services you utilise across your business. You can build your own service offering from the options below. Part of partnering with neXtgen Agri is the ability to regularly discuss opportunities and challenges and to seek guidance from the team.

## Strategy, planning, indexing and bull selection

nextgen  
AGRI  
**neXtSelect**

**neXtPredict  
Heifer**

This is the core of our offering to beef producers. We work with you to define and develop business goals, breeding objectives, strategies and action plans across your beef business. We are there to be on your team, helping you source the best bulls for your herd, whether analysing catalogues or bidding at the sale. We'll customise a **neXtSelect** index for your beef herd to help compare bull options, and create **neXtPlan** calendar, with optional reminders, to ensure you never miss the data you need. As a neXtgen Agri consulting client, you get immediate access to PRO pricing for **neXtPredict Heifer**, our collaborative offering with Weatherbys, Eurofins and Angus Australia.

## Data and DNA management

nextgen  
AGRI  
**neXtRecord**

You collect the data, and we manage it. We support you through the collection process to ensure you're gathering the information that brings the most value to your system. Depending on your needs, we can build draft files, interpret results and provide clear, practical reports. We'll help you use DNA tools to make confident decisions - identifying the right heifers to retain and getting the best out of your cattle from the DNA up.

## On-farm data and DNA collection

Not everyone loves collecting data as much as we do! If you need help collecting the right information for your breeding objective, in the most efficient way possible, our team can make it happen.

## Heifer selection

nextgen  
AGRI  
**neXtRank**

**neXtPredict  
Heifer**

We help you select replacement stock, highlighting the link between how animals look and how they measure. Structural scoring (either prior to or at the same time as selection) is highly recommended. If you have the data, we'll use **neXtRank** to rank the animals. If DNA has been collected with Weatherbys, we'll use **neXtPredict Heifer** to combine genomics and any data to get the most accurate ranking. We get the data set up on **neXtClass** in the yards so that well-informed decisions can be made.

## Commercial AI management

With bull prices at an all time record high, many breeders opt to use artificial insemination with proven bulls to provide some of the gene power they need. We help you work through this process and link you up with preferred suppliers to get the job done.

## Partnership pricing

We'll work with you to determine the best combination of services to suit your needs. Prices are GST exclusive and do not include any direct costs of travel or consumables used on your behalf.
