the 1990s, the number of people in the UK who are aged 65 and over has increased from 10.5 million to 13.5 million (19.5% of the population).

There are a number of reasons for this increase. The most important is that the life expectancy of people in the UK has increased. In 1990, the average life expectancy of a male was 74.5 years and of a female 78.5 years. In 2000, the average life expectancy of a male was 77.5 years and of a female 81.5 years.

Another reason for the increase is that the number of people who are aged 65 and over has increased in all countries of the world. This is because the life expectancy of people in all countries has increased. In 1990, the average life expectancy of a male was 71.5 years and of a female 75.5 years. In 2000, the average life expectancy of a male was 74.5 years and of a female 78.5 years.

The increase in the number of people aged 65 and over has led to a number of changes in the way that society is organised. For example, there has been a need to increase the number of people working in the public sector, particularly in the health and social care sectors. There has also been a need to increase the number of people working in the private sector, particularly in the health and social care sectors.

The increase in the number of people aged 65 and over has also led to a number of changes in the way that people live. For example, there has been a need to increase the number of people who are able to live independently. There has also been a need to increase the number of people who are able to live in the community.

The increase in the number of people aged 65 and over has also led to a number of changes in the way that people work. For example, there has been a need to increase the number of people who are able to work part-time. There has also been a need to increase the number of people who are able to work from home.

The increase in the number of people aged 65 and over has also led to a number of changes in the way that people spend their money. For example, there has been a need to increase the number of people who are able to afford to live in the community. There has also been a need to increase the number of people who are able to afford to live in the private sector.

The increase in the number of people aged 65 and over has also led to a number of changes in the way that people think. For example, there has been a need to increase the number of people who are able to think for themselves. There has also been a need to increase the number of people who are able to think for others.

The increase in the number of people aged 65 and over has also led to a number of changes in the way that people feel. For example, there has been a need to increase the number of people who are able to feel good about themselves. There has also been a need to increase the number of people who are able to feel good about others.

The increase in the number of people aged 65 and over has also led to a number of changes in the way that people act. For example, there has been a need to increase the number of people who are able to act for themselves. There has also been a need to increase the number of people who are able to act for others.

The increase in the number of people aged 65 and over has also led to a number of changes in the way that people are. For example, there has been a need to increase the number of people who are able to be themselves. There has also been a need to increase the number of people who are able to be for others.

The increase in the number of people aged 65 and over has also led to a number of changes in the way that people are. For example, there has been a need to increase the number of people who are able to be themselves. There has also been a need to increase the number of people who are able to be for others.

The increase in the number of people aged 65 and over has also led to a number of changes in the way that people are. For example, there has been a need to increase the number of people who are able to be themselves. There has also been a need to increase the number of people who are able to be for others.

the 1990s, the number of people who are employed in the service sector has increased in all countries. The increase is most pronounced in the United States, where the service sector has become the dominant sector of the economy. In the Netherlands, the service sector has also become the dominant sector, but the increase is less pronounced than in the United States.
