The 6/3/25 Agenda could not be approved

**Reports:**

**Golf Superintendent report Stephen Schrepfer/IGM-** See written report

The tree plan was not located and will be discussed at the next meeting. The BVSA does have a reserve for tree replacement and maintenance.

**PGA Golf Professional Duane Gore-** See written report

There were no closures last month. Two tournaments are scheduled for June, including the President's Cup.

**Lake Water Quality**

Twenty-three acre-feet were used in May. They are filling 4 Island and Cub Lakes from Jack's Hole. They are approximately two weeks ahead of the amount of water used last year. They plan on turning on the pumps to fill the lakes the third week in June. The drainage ditch along number eight fairway is still not being used for nutrient adsorption. Projects awaiting approval through the CSD have been delayed. The CSD is still working on the Title 22 report. There is some chance of getting usable non-potable water but it is not a guarantee presently.

**Unfinished Business:**

The Association Board approved the requested irrigation control system dependent upon the data capacity in the maintenance building. No update on the yardage markers. The driving range dress code enforcement is in transition with the pro shop telling range ball purchasers about the requirements. IGM and the pro shop will look at the ladies number six and fifteen tee boxes to see if they can be mowed more in line with the fairway rather than pointing to the right of the fairway.

**New Business:**

None
