Addendum C Hoop Netting Four Island Lake

BEAR VALLEY SPRINGS ASSOCIATION

FOUR ISLAND LAKE

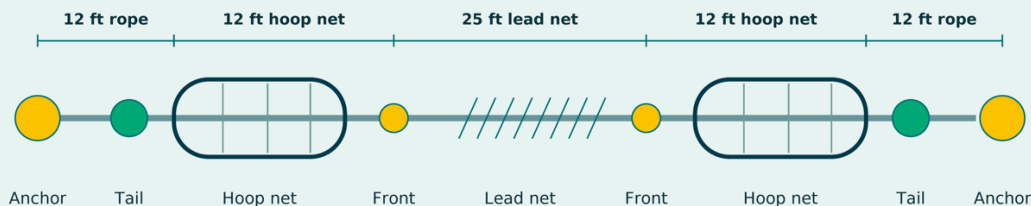

Winter hoop netting is underway

Bear Valley Springs Association's Lake Quality Advisory Committee, working with Mountain View Consulting Group, has begun winter hoop netting at Four Island Lake. Nets are anticipated to remain through April 2027 to remove invasive bullhead catfish. Please stay clear of all marked nets and ropes.

HOW THE SETUP IS ARRANGED

Overall length: 73 feet. Diagram not to scale; layout may be reversed.

Large yellow buoys mark the end anchors. Green buoys mark the tail ends of the hoop nets where they connect to anchor ropes. Small yellow buoys mark the fronts of the hoop nets, with the lead net between them.

Boy Scout Troop 164 Quartz Hill learning about the hoop nets and lead net before winter deployment.

PLEASE KEEP CLEAR

Do not boat, paddle, fish, swim, or cast between the buoys or over the nets. Lines and netting may be below the surface. Do not move or handle the buoys, ropes, or nets. Steer around the entire marked area.

Thank you for helping protect Four Island Lake.

Winter 2026-27 | Net placement and removal timing may change.
