Tiling becomes child's play

Dumawall: waterproof wall covering with a unique installation method with tongue and groove system. The Dumawall+ wall tiles are composed of completely solid, UV-resistant panels and provide an elegant finish to indoor walls. With no worries in installation, no inconvenience in maintenance.

A new bathroom in 1 day

Dumawall is perfect for your renovation project.

- Easy installation thanks to tongue-and-groove system and a long nail lip.
- Easy to cut with a box cutter, hand saw or circular saw.
- The back of our tiles is ridged. When installing with adhesive this ensures greater adhesion to the wall because the adhesive is better distributed.

Also available in XL

A new shower in a flash with our XL panels of 90 × 260 cm or 120 × 260 cm with jointless tongue and groove connection.

Installation directly on old tiles

Gluing: you can glue them directly onto old tiles

Packaging

*** Dumawall XL - now also sold per panel!**
Some colors are now available individually, in addition to the standard 2-panel packs.

- Buy only what you need – perfect for small projects
- Less waste, easier handling – lighter and more practical

Dumafix tube adhesive

Strong & high-tech

RCB® base panel

patented Rigid Core Board technology

RCB® patented Rigid Core Board technology

We guarantee the highest quality thanks to the use of top-quality raw materials in combination with a unique patented RCB technology.

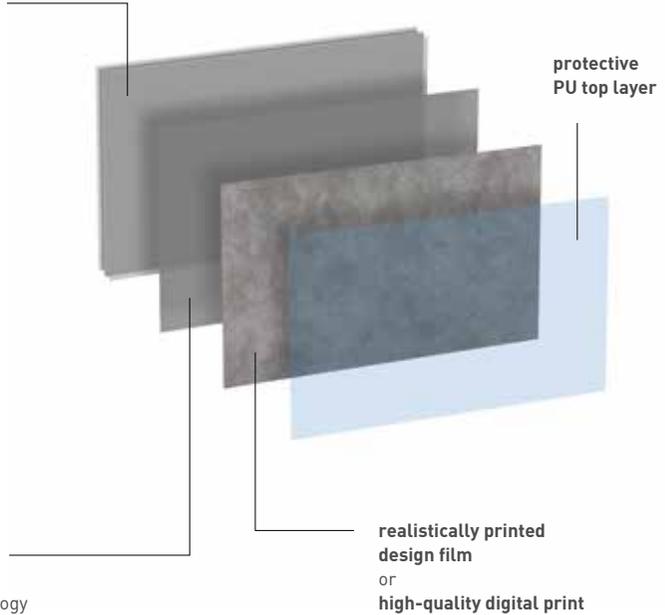

This process ensures a strong adhesion of the base panel with the design film, which will not detach even after for many years of contact with water.

Nor will deformations develop in case of temperature variations.

RCB® extra Coex adhesion layer for wet rooms
