

ENTRY LEVEL FULL STACK DEVELOPER

Location: Orlando, Florida, USA

Job Status: Full time, in-person with ability to earn hybrid model

Date Posted: 09/09/2026

Position Summary:

Under the general direction of the Marketing Director, the **Entry Level Full Stack Developer** for Tools/Websites will be instrumental. This entry level role involves working across the full stack of our technology platforms, from crafting dynamic front-end interfaces to developing robust back-end systems. This role will collaborate closely with all the company's business units and will participate in the design, development, and testing of application-based tools and websites. This position will be expected to have a keen eye for design and usability, alongside strong technical skills in coding and system design.

Essential Duties and Responsibilities:

- Design, implement, and maintain both the front-end and back-end of application-based tools and websites.
- Write clean, functional, and sustainable code with comprehensive tests to validate implementation.
- Identify, troubleshoot, and debug issues in production and staging environments.
- Create relevant documentation for application-based tools and websites with minimal supervision.
- Collaborate with Product Management and UI/UX experts to identify, clarify, and achieve functional and aesthetic requirements.
- Optimize Engineering processes by recommending improvements to policies and procedures.
- Estimate software work packages and provide input to for planning purposes.
- Ensure stability and optimal performance of application-based tools and websites.
- Develop end-to-end solutions that enhance user experiences and meet the company's strategic objectives.

Supervisory Responsibilities:

- None

Competencies:

- **Adaptability:** Likes to have new experiences; quickly adjusts to changes; prefers novelty to routine; is flexible regarding new initiatives.
- **Conflict Management:** Deals with disagreements that arise; defends their positions; gives in when appropriate; seeks an acceptable compromise and, ideally, “win-win” solutions.
- **Creativity:** Is creative and inventive; is motivated to find new solutions; values new ideas; is innovative; finds creative solutions.
- **Initiative:** Likes to have leeway and flexibility; sets their own direction; can act without support or approval of others; trusts in their own judgement.
- **Teamwork & Contribution:** Feels a need to help people who are having trouble or are in need; feels a sense of duty towards others.

Qualifications:

Required

- Bachelor's degree in software engineering or equivalent field.
- 1-3 years of professional experience in software development, but all experience levels are welcome to apply.
- Strong abilities with applicable web development languages such as HTML, CSS, Angular, React, etc.
- Strong proficiency with standard programming languages such as C#, .NET, DevExpress, etc.
- Strong capabilities with database structures and SQL/SQL Server
- Capacity to work and deliver with both agile and traditional development cycles.
- Knowledge of maintaining the Windows server by monitoring the logs and services running on production and staging environments.
- Experience in WINDOWS and Microsoft Suite

Desired

- Knowledge of the Atlassian tool suite (JIRA, Fisheye/Crucible)
- Knowledge of code versioning software such as Git, Gitlabs, and Team

Foundations Server.

- Master's Degree
