Portfolio Management
& Transformation

Discover the EVO-Cloud Solutions
Use our software to focus on business results

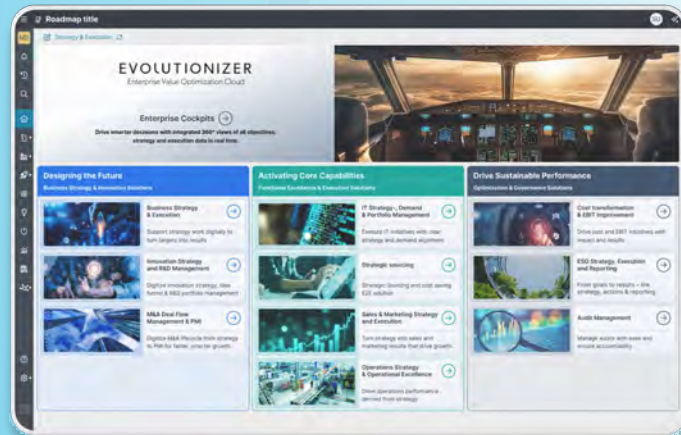

The EVO-Cloud

Connects your vision to every action across the business

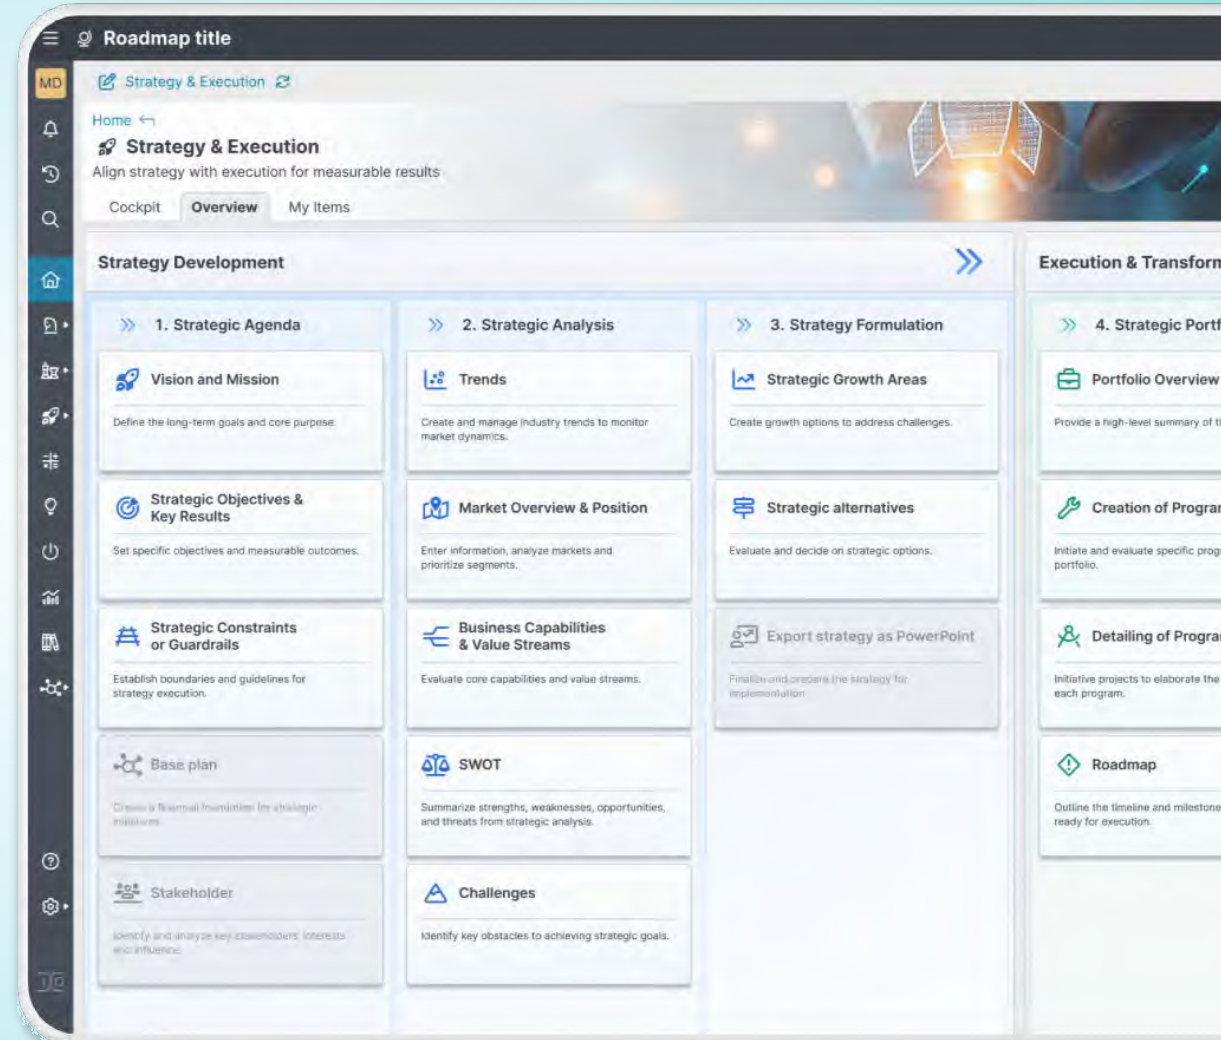

Your strategy & transformation are only as good as their execution – and execution is broken in most companies.

The Enterprise Value Optimization Cloud (EVO-Cloud) gives you visibility, alignment & control in real time. It serves as a single source of truth and assures transparency of all ongoing programs & projects.

The Evo-Cloud helps every leader turn strategy and objectives into measurable results.

The EVO-Cloud: Solutions

Serves as a single source of truth for any digitized process

The EVO-Cloud

Business capabilities

Decision Support

EVO-Cloud unifies data to support informed decisions, bridging analytics and expertise with a single source of truth.

Business Impact & Visualisation

EVO-Cloud reveals gaps between plans and execution, combining reports, trends, and expert insights to deliver actions and simulate financial impact.

Portfolio Management

EVO-Cloud streamlines the planning and management of portfolios, programs, and projects by aligning goals with actionable, measurable initiatives.

Scenarios & Simulation

EVO-Cloud enables fast, informed responses to change through scenario planning and financial simulations, incorporating assumptions and sensitivity analyses.

Unique end-to-end (E2E) process:

EVO-Cloud uses a unique end-to-end process with built-in best practices to support optimized decision-making.

Workflow Management

EVO-Cloud uses digital workflows to align all organizational levels, enabling seamless coordination and collaboration across the enterprise to support goal achievement.

KPI Management

EVO-Cloud delivers tailored dashboards with key qualitative and quantitative KPIs, aligning individual management goals with overall corporate objectives.

AI-Enhanced Analytics

The EVO-Cloud can be immediately expanded with AI functions (optional)

Role-Based Access Rights

EVO-Cloud features an advanced authorization system that reflects decision-making roles and maps all program and project workflows, including approvals.

The EVO-Cloud

Technical capabilities

Configurable & modular

Low-code and modular rollout

- The EVO-Cloud enables a gradual introduction with rapid value creation
- It is designed according to the solution box principle: needs-based, scalable and efficient
- The EVO-Cloud supports individual implementation strategies and governance models

Highest data security

e.g. ISO 27001, 27017, 27018, TISAX and GDPR

- Trust in tested standards
- Native SaaS solution based on Microsoft Azure
- Complies with ISO 27001, 27017/18, TISAX, and GDPR
- Fully client-managed – for maximum flexibility and stability

Fully integrated & selective AI

Standard interfaces for existing business application

- EVO-Cloud integrates seamlessly with existing systems, Microsoft 365 and other data sources and unlocks internal and external knowledge
- AI-supported analyses possible (optional)

Global business ready capability & localization

Multi-language and multi-local capabilities at your fingertips

- The EVO-Cloud is designed for internationally operating organizations
- It is a multilingual, multi-tenant solution
- The EVO-Cloud takes into account regional requirements, legal frameworks and cultural differences
- The EVO-Cloud stands for smooth deployment in globally distributed teams – without media disruption

Microsoft technology

Azure & MS-AI-Copilot

- The EVO-Cloud is a future-proof platform with a strong foundation
- Fully Microsoft compatible (Azure, 365, Copilot, etc.)
- Benefit from innovation, stability, and global availability
- Easy for IT departments to integrate and manage

The EVO-Cloud: Benefits

Our end-to-end Enterprise Value Optimization Cloud delivers

Value creation through effectiveness

50%

reduction of the strategy
opportunity & execution gap

80%

reduction of
wasted time

90%

reduction of
reaction time

10X

more strategy &
transformation data for
advanced analytics & AI

Increase in efficiency

We are EVO

By merging state-of-the-art IT technology with deep business expertise, we have developed a unique product – the EVO-Cloud – that empowers decision-makers at all levels.
