Forestwise Virgin Coconut Oil for Cosmetics

Coconut (or *Cocos nucifera*) is a fruit native to tropical Southeast Asia. Virgin Coconut Oil contains one of the highest lauric acid levels in the plant world.

Virgin Coconut Oil can also promote skin hydration and is therefore used most often for body lotions and soap. Traditionally it is used for burn and wound medication. Due to the rich fatty profile, it is also used as a natural moisturizing agent.

Product

We offer 100% traceable Virgin Coconut Oil:

Virgin Coconut Oil

Also known as : Coconut, Copra

Source: Indonesia

Consistency: Liquid to solid oil

Colour: Clear to white oil

Scent: subtle coconut tones

Virgin Coconut Oil, derived from the fruit of the *Cocos Nucifera* plant, is recognized for its high lauric acid content and numerous benefits in skincare and health. The oil has gained popularity due to its fatty acid constituents that are beneficial for cosmetic applications.

Virgin Coconut Oil

Young coconuts are harvested directly from the tree that are naturally maintained to produce Organic Virgin Coconut Oil. Virgin coconut oil is extracted through a completely cold centrifuge process while maintaining its fragrant natural odour using a strict quality control. Virgin Coconut Oil is rich in Lauric acid, Myristic acid, Palmitic acid and Caprylic & Capric acids.

Our Cold Pressed Virgin Coconut Oil (VCO) is available with Organic and Cosmos Approved certification.

Virgin Coconut Oil for the Cosmetics Industry

Virgin Coconut Oil is rich in fatty acids, particularly lauric acid (C12:0) and myristic acid. These components are known for their moisturizing properties, which help improve barrier function in the skin. The oil's high lauric acid content aids in softening dry skin. Examples cosmetics industry of applications include:

Cream

Lip Product

Soap

Balms

Butter

Sun Screens

Specifications
