

Enduris™ Liquid Flashing

Repair leaks quickly & efficiently.

The preferred product for service managers and crews!

- Excellent adhesion and elongation
- Convenient, easy-open 2 gallon pail
- No mixing required
- Excellent for cold weather application
- Rain ready in minutes!
- Permanent, durable repairs

From roof maintenance to duct work repair, with a pail of Enduris Liquid Flashing in your truck, you can rest assured that repairs will be quick, efficient and long-lasting.

Enduris Liquid Flashing is a 100% silicone, single-component liquid sealant for repairing virtually all types of substrates.

A single application can seal and repair cracks and seams, protecting against air and water leaks that can lead to mold, mildew, rot and rust, withstanding the most demanding and extreme environments.

Other potential applications include perimeters of skylights, rain gutters, HVAC units, electrical and plumbing penetrations, and vertical to horizontal transition repairs.

Durable. Weatherproof. Secure.

Waterproof - Quickly attains weather-resistant properties and is unaffected by ponding water.

Exceptional Durability - Excellent elongation. This high-performance 100% silicone formula can withstand the most demanding and extreme environments, with long-term resistance to extreme temperatures, UV rays, rain, and snow.

Outstanding Adhesion to Most Surfaces -

- Common roof substrates such as TPO, EPDM, metal, concrete and more.
- Metal including aluminum or steel for gutters and HVAC units.
- Horizontal and vertical concrete and masonry such as brick or cement block materials.

No Mixing, No Primer, Low Odor - Simply snap open the pail and the product is ready to use- enabling time and money savings on labor and extra material costs. Its low odor will be welcomed by applicators, and be of minimal effect to the building interior.

Easy to Use - The material can be applied with a trowel, stiff brush or gloved hand, with sufficient open time for tooling before it cures. High viscosity helps ensure coating remains in place on high pitches, vertical surfaces, or parapets until it fully cures.

Benefit Now and Later

Time and labor savings

With an easy-open pail and no primer required, this product can offer significant cost savings associated with labor, material and time delays. It is re-coatable for situations when a full restoration is needed after a repair.

Cold & Hot weather application

Can be applied throughout the year in temperatures ranging from 0°F to 120°F (-17°C to 49°C), helping to avoid project delays and keeping service departments and crews working.
