

One Platform for Formulation and Quality

Uncountable connects pharmaceutical R&D, formulation, quality control, and PLM on one structured, validated data layer. Teams run development, analytical QC, and batch release with full traceability and audit-ready, GxP-aligned records.

What It Drives for Pharma R&D and QC

From formulation and analytical development through QC batch release, on one connected platform.

"Uncountable distinguished itself with its exceptional data model and unified lab IT platform. Its flexibility and user adaptability, paired with automated reporting of complex scientific data, were decisive factors in our choice." Christian Hildebrandt, Head of Site Management Lab Services, Merck KGaA, Darmstadt, Germany

For Pharmaceutical R&D, QC, and Release

CMC data, connected

Formulation, process, analytical methods, and specifications on one drug-product record.

QC release against spec

Assay, impurities, dissolution, and content uniformity flagged in-spec or out-of-spec, with live SPC.

Analytical labs, digitalized

Instrument data to LIMS to reporting in one platform, across hundreds of methods.

GxP validation support

A validation kit each release, with IQ and OQ done for you.

Traceable and audit-ready

Automatic audit trails and e-signatures aligned to 21 CFR Part 11 and EU Annex 11, built for ALCOA+.

Connected R&D, PLM, QC and QMS

One data layer, so a change filters through the whole record with no re-entry.

Drug-Product Formulation and QC on One Connected Record

A drug-product formulation and its analytical release results live on the same record, so quality decisions are backed by the formulation and process behind them.

Formulation and composition

Process parameters

QC results vs spec

In-spec vs out-of-spec flags

Audit trail and e-signature

What Sets Uncountable Apart for Pharmaceutical teams

Unified R&D, QC, QMS, and PLM

One platform and one data model, not three tools stitched together.

Formulation-native and flexible

Adapt data models and workflows to your products without heavy services.

Analytical-lab digitalization

Instrument to LIMS to report, across hundreds of methods, in one platform.

ALCOA+ and FAIR-aligned data

Compliant data integrity aligned to 21 CFR Part 11 and EU Annex 11, plus findable, reusable data across the enterprise.

From formulation to batch release, on one auditable record
