

The Uncountable Portal: Supplier Registration Without the Chase

One place to invite suppliers, collect the documents you require, and keep every registration as a structured record connected to the materials they supply. Not another inbox to manage.

For procurement, supplier quality, and quality management teams onboarding and requalifying raw-material suppliers

What You Can Do with the Portal

Onboard New Suppliers

Invite a supplier to a guided registration form, with the fields and documents you require made mandatory.

Collect Every Document

Certificates, safety data sheets, and technical data sheets arrive against the right supplier record.

Requalify Without Rebuilding

Send the same form again when a certificate lapses or a site changes, and keep the history in one place.

Hand Off to Quality

Submissions land as records your quality team reviews and links to the raw materials they cover.

Why Teams Choose It

Connected to your material data

Approved suppliers link to the raw materials and formulations that use them, with no separate system.

Better data quality

Required fields and documents are enforced at submission, so incomplete registrations stop coming back.

Less low-value work

Your team stops emailing suppliers to explain what is still missing from a registration.

No Seats to Buy

Suppliers get a secure link and sign in. Nothing to install, and no software to manage.

Self-service status

Suppliers track their own registration without pulling your team into another email thread.

Configurable to your workflow

You define the fields, required documents, and review stages for each type of supplier.

One Form for Suppliers, One Record for You

Registrations arrive as emails, spreadsheets, and PDFs. The Portal turns them into complete, validated supplier records that land straight in Uncountable, with no re-keying and no chase.

The screenshot shows the 'Supplier Registration' page in the Uncountable portal. The left sidebar contains navigation links: Dashboard, Requests, Raw Materials, Documents, Suppliers (highlighted), and Catalog. The main content area is titled 'Suppliers / SUP-0148' and 'Supplier Registration'. It features a progress bar with steps: Invited, Submitted, Documents Checked, Quality Review, and Approved (current step). Below this, there are two main sections: 'Registration Details' and 'Required Documents'. The 'Registration Details' section lists: Supplier (Northline Polymers), Contact (Marcus Vale), Category (Raw Materials), Sites (3), Submitted (Jun 25, 2026), and Materials supplied (4). The 'Required Documents' section is a table with columns: Document, Submitted, and Status. It lists: ISO 9001 certificate (1 of 1, Complete), Safety data sheets (4 of 4, Complete), Technical data sheets (4 of 4, Complete), Site addresses (3 of 3, Complete), and Quality agreement (1 of 1, Complete). At the bottom, there is an 'Activity (full audit trail)' section with a list of events: Jun 25 - 10:02 (Marcus Vale submitted the registration via the Portal), Jun 25 - 10:03 (Auto-validated against the required documents), Jun 26 - 09:14 (Priya Nair approved and linked it to the supplier record), and Jun 26 - 11:40 (Documents attached to 4 raw-material records). The bottom left of the sidebar shows a user profile for Priya Nair, Supplier Quality.

Suppliers / SUP-0148

Supplier Registration

Invited Submitted Documents Checked Quality Review **Approved**

Registration Details

Supplier	Northline Polymers
Contact	Marcus Vale
Category	Raw Materials
Sites	3
Submitted	Jun 25, 2026
Materials supplied	4

Required Documents

Document	Submitted	Status
ISO 9001 certificate	1 of 1	Complete
Safety data sheets	4 of 4	Complete
Technical data sheets	4 of 4	Complete
Site addresses	3 of 3	Complete
Quality agreement	1 of 1	Complete

Activity (full audit trail)

- Jun 25 - 10:02 Marcus Vale submitted the registration via the Portal
- Jun 25 - 10:03 Auto-validated against the required documents
- Jun 26 - 09:14 Priya Nair approved and linked it to the supplier record
- Jun 26 - 11:40 Documents attached to 4 raw-material records

Secure invite and login

Your required documents

Complete and validated

Lands as a record

Your quality team acts in-platform

Secure by Design

Enterprise-grade security and compliance, built into every supplier submission.

Traceable by default

Timestamped, versioned, and tied to a submitter identity, with a full audit trail of changes.

No platform exposure

Invited suppliers access specific forms only, never the full platform or another supplier's data.

Built on Uncountable

SOC 2 Type II and ISO 27001, with e-signatures aligned to 21 CFR Part 11, plus role-based access.

Data isolation by default

Your data is isolated at the schema level, never mixed with another organization's.

Encrypted end to end

AES-256 at rest, TLS in transit, hosted in your region (US, EU, or Japan).

Backed up and recoverable

Daily backups across regions, a documented disaster-recovery plan, and yearly third-party penetration tests.

Less time chasing paperwork. More time on the science.

See It on Your Own Workflow

No slideware, just your supplier onboarding.
