

Fewer experiments, faster launches, less rework

SUMMARY

Fragmented product data means repeated experiments, slow launches, and decisions made on stale numbers. Centralizing it changes the math.

45%

less design-of-experiments workload

>50%

reduction in time from testing to results delivered

Cabot Corporation

"Our aim is to connect our R&D developers through a single platform, allowing us to unlock valuable insights and drive innovation across our categories, functions, and regions."

Joseph Manton, Senior Director of Digital R&D, Mondelēz International

One platform, five suites

R&D, Quality, Product Lifecycle, Regulatory Management, and Project Portfolio Management, delivered as five suites on one connected data model.

Research & Development

All-in-one AI solution for formulators, with tools for DOE, experiment capture and optimization, and analysis.

- R&D
- Electronic Lab Notebook (ELN)
- LIMS for R&D

Quality

Embed traceability and standardize processes in a single platform with our AI-native LIMS and QMS.

- LIMS for Quality
- Quality Management System (QMS)
- Environmental Monitoring

Product Lifecycle

One system for defining, rationalizing, and managing your full catalog of products across their lifecycle.

- Product Lifecycle Management (PLM)
- BOM & Formula Management
- Rationalization

Regulatory Management

Mitigate risk and minimize manual work with our embedded and AI-powered regulatory solution.

- Regulations Database
- Recipe Compliance Checks
- SDS Regulatory Data

Project Portfolio Management

Configurable project management to plan, resource, schedule, and track time in a single place, enabled with AI.

- Request Management
- Stage Gates
- Time Tracking

BASE PLATFORM Bodie AI Agent

Find, analyze, and act across every suite from a plain-language prompt.

ADD-ON The Portal

Brings external partners into a workflow without a platform seat.

Uncountable's AI-native end-to-end platform is deployed by 175+ product development teams.

WHAT SETS UNCOUNTABLE APART

Most systems store the answer. We store the evidence.

Unified system of record

R&D, Quality, Product Lifecycle, Regulatory Management, and Project Portfolio Management in one platform.

Analysis where the data lives

Built-in visualizations, live SPC, and reporting on the same records as your experiments, so insight never requires an export.

Formulation-native and flexible

Adapt data models and workflows without heavy engineering, built for industries where products change often and variants are common.

Real AI, foundational

Models built by ML researchers, Bodie AI Agent, and an MCP connector that opens your structured data to external AI tools.

Bidirectional instrument integrations

Syncs with ERP & CRM via API; connects to lab instruments bidirectionally; and an MCP connector for external LLMs and AI assistants.

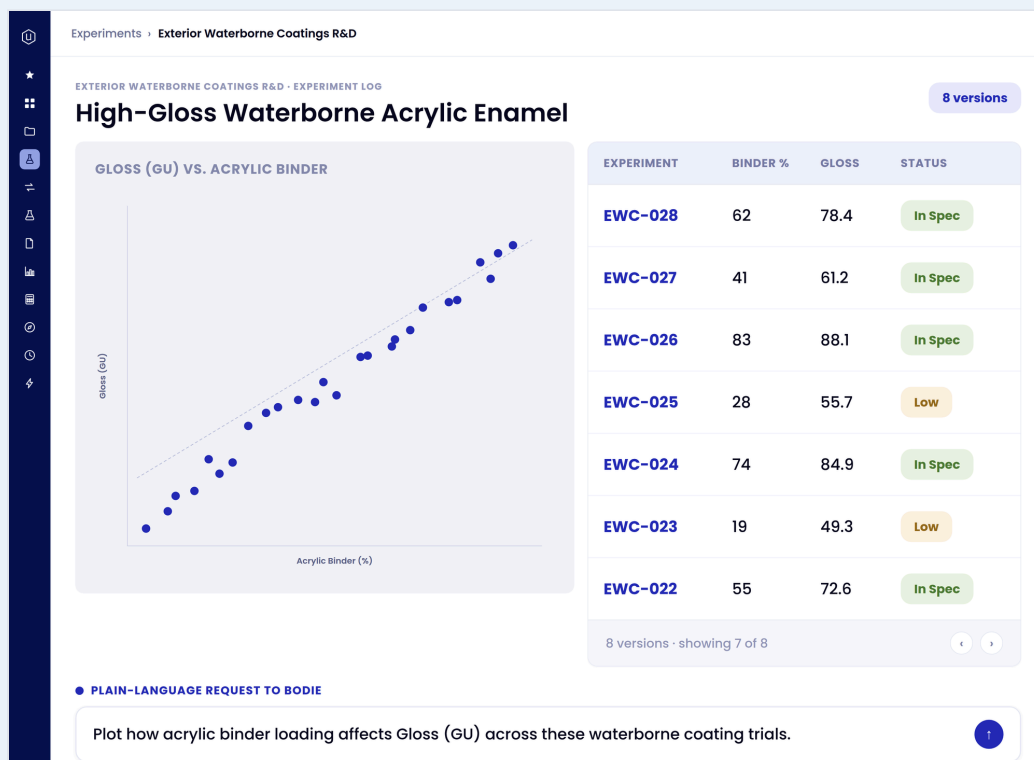

Security & compliance, built in

SOC 2 Type II and ISO 27001; e-signatures aligned to 21 CFR Part 11 and EU Annex 11; schema-level tenant isolation.

Bodie works across your whole platform

R&D, Quality, Product Lifecycle, Regulatory Management, and Project Portfolio Management all share one data model, so Bodie can act on all of it from a plain-language prompt to build visualizations, diagnose root cause, automate workflows with Skills, and summarize projects.

See it on your own data

Book a personalized demo and we'll show you how Uncountable applies to your lab.
