Supplier registration **without the chase**

UNCOUNTABLE PORTAL

Invite suppliers to a guided form, collect the documents you require, and keep every registration as a record in Uncountable that your team links to the raw materials it covers.

ONBOARD

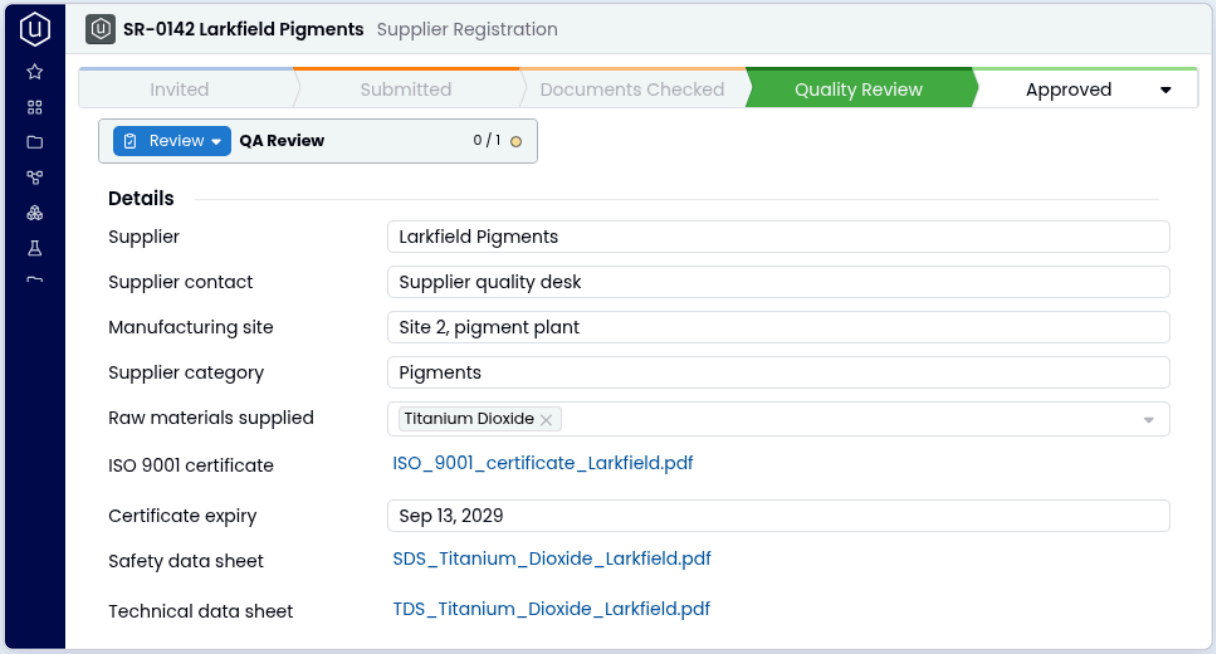

Invite a supplier by email to a form with the fields and documents that you require.

REQUALIFY

A phase change can invite the supplier again, for example when a certificate lapses.

BODIE AI AGENT

Ask Bodie AI Agent about a registration. Bodie reads the field values and the workflow of the record to answer.

THE UNCOUNTABLE PLATFORM

- Research & Development
- Quality
- Product Lifecycle
- Regulatory Management
- Project Portfolio Management

Uncountable's AI-native end-to-end platform is deployed by 175+ product development teams.

DuPont · SunChemical a member of the DIC group · Sika · CLARIANT · Mondelēz International · Beiersdorf

HOW IT WORKS

One form for suppliers, one record for you

Registrations often arrive as emails, spreadsheets, and PDFs. With the Portal, suppliers fill in one form, and each submission lands in Uncountable as a record, with no re-keying.

Collect every document

Suppliers upload certificates, safety data sheets, and technical data sheets to their own registration.

Required fields

Mark the fields that you need as required. The form does not move to the next phase until they are complete.

Sign in with a link

Suppliers sign in from the link in the invitation email, in a web browser, with nothing to install.

Self-service status

Suppliers open their forms from the Portal home page and see the current phase of each one.

Configurable to your workflow

You define the fields, the phases, and the reviews for each type of registration.

Hand off to quality

Your quality team reviews each submission in the platform, in the Portal Forms listing.

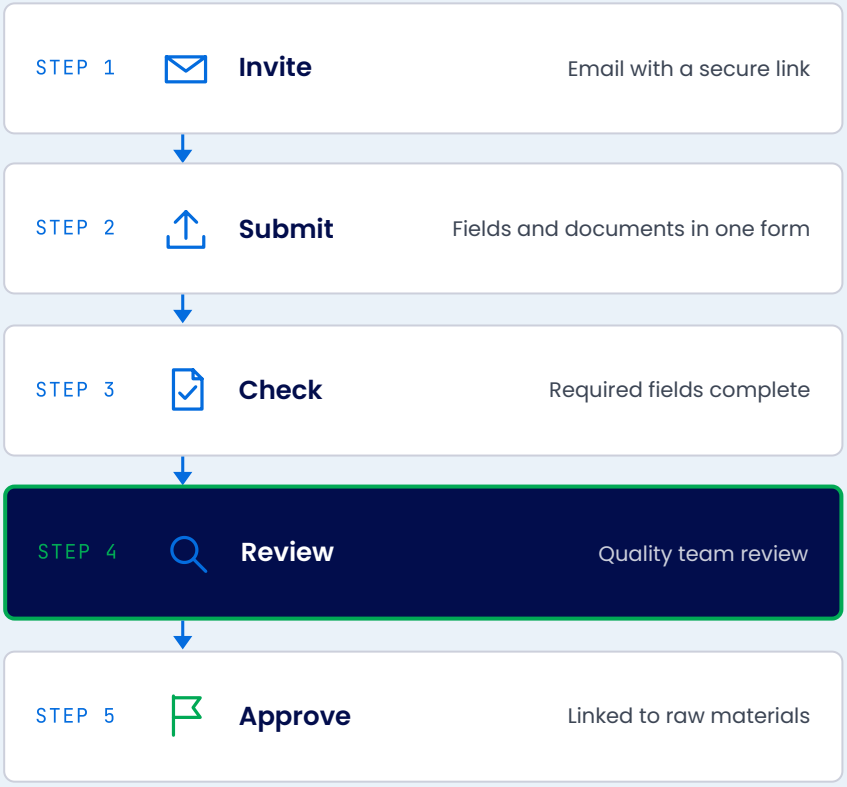

From invite to approved supplier

An example workflow for a new pigment supplier. You set the phases and the reviews.

SECURE BY DESIGN

Built on Uncountable

- Invited suppliers see only the forms that you share with them, never the full platform or another supplier's data.
- Each change records the user and the time, in a full audit trail.
- SOC 2 Type II and ISO 27001.
- AES-256 at rest and TLS 1.2+ in transit.
- Data isolated at the schema level, hosted on AWS in the US, EU, or Japan.
- E-signatures aligned to 21 CFR Part 11 and EU Annex 11.

Less time chasing paperwork. More time on the science.

See it on your own workflow

No slideware, just your supplier onboarding. Book a demo, or email sales@uncountable.com.
