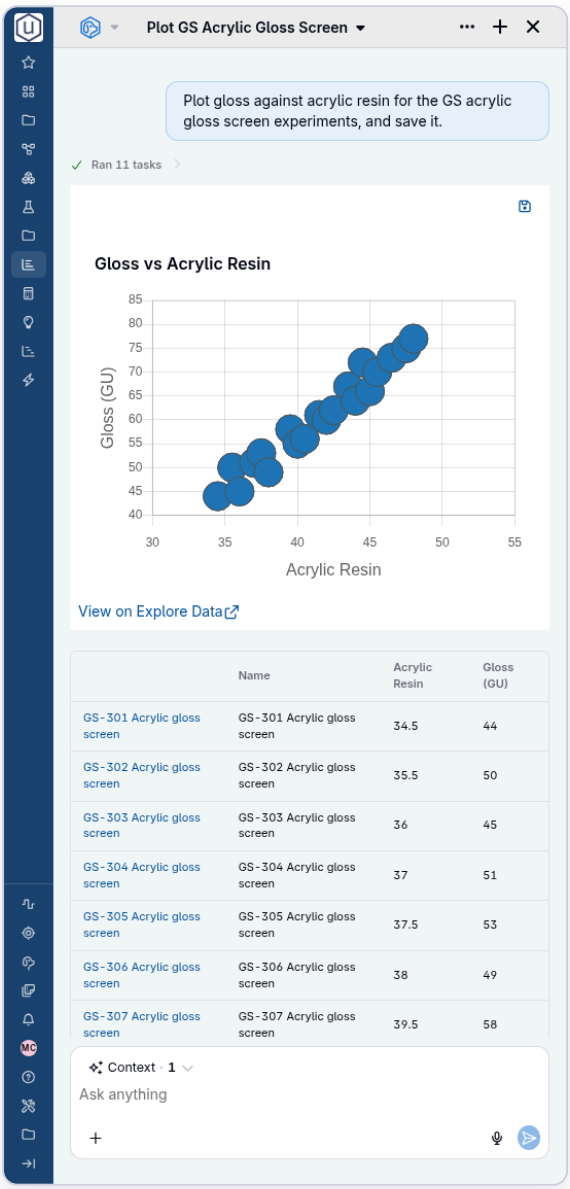
AI that doesn't just answer, it acts

SUMMARY

Bodie is Uncountable's AI assistant for scientists, available in every page of the platform. Bodie answers questions from your data and acts across your records. It runs in your tenant, and your formulation data never trains foundation models.



ENTERPRISE ACTION

Acts across your records

Bodie creates and edits experiments, formulas, and notebooks. It executes bulk modifications and routine tasks inside each user's permissions.

REPORTS AND SLIDE DECKS

Turns results into a deck

Bodie puts charts, stats, and tables on a whiteboard. You export the whiteboard to PowerPoint.

TRACEABLE CITATIONS

Answers with linked sources

Bodie links each recommendation to the record, notebook, or file behind it. When no source exists, Bodie labels the advice as general knowledge to validate before lab use.

SECURITY AND GOVERNANCE

Runs in your tenant

Your proprietary formulation data never trains external foundation models. Enterprise security includes SOC 2 Type II and ISO 27001.

"The most valuable thing is speed. It reduces trial and error and helps me understand not only what to do, but why it works that way."

Marco Tapken, Head of Department R&D Tinting, Remmers

Uncountable's AI-native end-to-end platform is deployed by 175+ product development teams.

Spend more time on science

From plain language to done, with Bodie

Bodie is built into every page of Uncountable, and learns and acts from your data. What can it do in your lab?

Find any past result, note or file
Search in plain language: Bodie reads and compares full documents.

Filter and reshape tables
Filter, sort and add columns, reshape any table with a single prompt.

Build visualizations from a prompt
Plot your data by describing it, with no manual axis setup.

Author calculations
Describe a formula in plain language, and Bodie configures the calculation.

Connect external tools
AI plugins link Bodie to Jira, Confluence, GitHub, Notion and Slack.

Build automated data pipelines
Attach an instrument file, and Bodie builds a reusable data upload pipeline.

Create and edit notebooks
Bodie drafts experiment notebooks and edits cells with one-click review.

Accelerate formulation development
Uncountable's machine learning engine, now guided by Bodie.

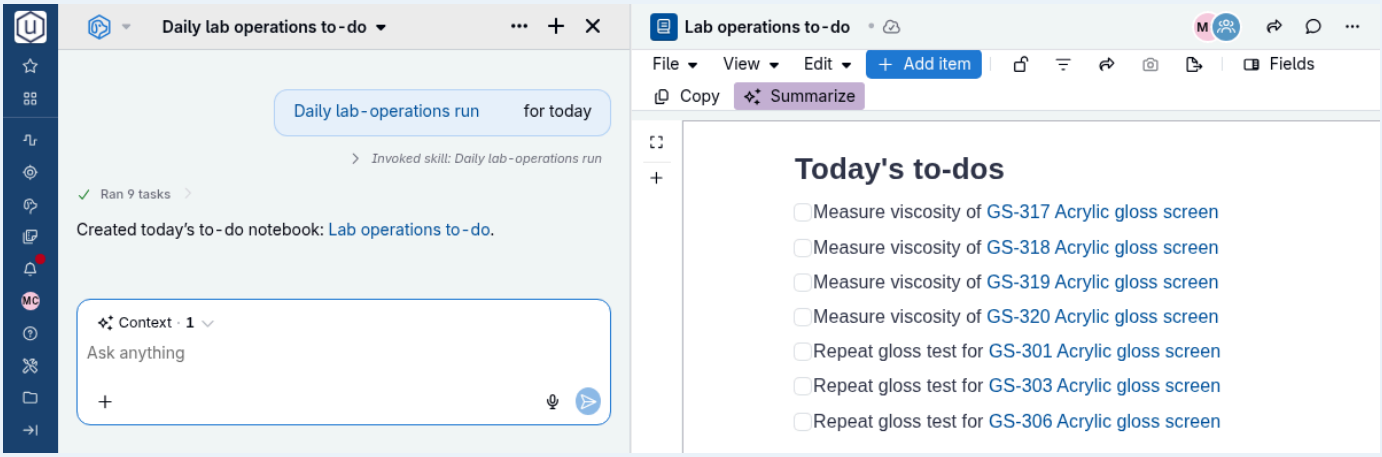
Work across every suite
R&D, quality, PLM and project management share one data model, so Bodie acts on all of it.

Automate any workflow with skills

Write a multi-step process once, and Bodie runs it on demand.

Trigger
Daily lab-operations run

Deliverable
Drafted to-do notebook



See Bodie work on your own data.

Book a personalized demo and we'll show you how Uncountable applies to your lab.
