A PPM that knows its own status

SUMMARY

See every project next to the data underneath it. Uncountable PPM lets R&D and innovation leaders take in requests, run stage gates, and plan the work on the same platform as the experiments, specs, and products behind it.

46%

faster formula reviews, saving 34 hours per review

Behr Paint Company

"Prior to Uncountable, our teams relied on multiple systems to support data management and production related approvals. As our needs evolved, Uncountable helped us create a more connected and scalable foundation that better supports R&D today while positioning us for future innovation and growth."

Greg Williams, Director of Sustainability & Digital Informatics, Behr Paint Company

WHY UNCOUNTABLE PPM

Portfolio status from the project records

Each project is a record with its phase, its fields, and links to the lab work behind it. Listings, gate reviews, and exports all read from those records.

Every phase in one view

A listing shows each project with its phase and the fields you choose. Save the listing for the next review.

Actions when a phase starts

When a project enters a phase, a trigger can create its tasks, email its watchers or reviewers, or call a webhook.

Portfolio review packs

Export a listing to Excel, CSV, or PDF for a portfolio review.

Identity	Workflow Phase	Project Lead	Business Unit	Next Gate Review	Target Launch
Low-VOC clearcoat reformulation	Development	Ines Moreau	Coatings	Nov 12, 2026	Apr 15, 2027
Shelf-life extension, snack bar	Feasibility	Caleb Odum	Food & Beverage	Nov 5, 2026	Jun 30, 2027
Bio-based emulsifier screening	Idea	Hana Sato	Personal Care	Nov 20, 2026	Sep 1, 2027
Sealant adhesion upgrade	Scale-up	Felix Brandt	Adhesives	Oct 29, 2026	Jan 18, 2027
Recycled-content resin grade	Development	Ines Moreau	Plastics	Dec 3, 2026	May 24, 2027
Fragrance stability program	Launch	Hana Sato	Personal Care	Nov 2, 2026	Nov 30, 2026
Barrier film coating, gen 2	Feasibility	Caleb Odum	Packaging	Oct 27, 2026	Aug 16, 2027
Conditioner surfactant swap	Scale-up	Felix Brandt	Personal Care	Nov 9, 2026	Feb 22, 2027

Innovation projects and their stage-gate phases in one listing.

Uncountable's AI-native end-to-end platform is deployed by 175+ product development teams.

WHAT UNCOUNTABLE PPM DOES

From request to launch on one platform

Portfolio decisions run on the same records as the work they track.

Request intake

Teams submit requests in the platform, and external users submit forms in the portal. A trigger can create a project from a request and link the two.

Configurable stage gates

Define the phases of each workflow, the reviewer groups at each gate, and the fields a project needs before it moves on.

Tasks and Gantt charts

Plan tasks with a lead, a start time, a duration, and the tasks they depend on. Gantt charts show milestones and the critical path.

Resources and time

Book equipment on the resource timeline, where a resource can reject a booking that overlaps one it already holds. Log hours in timesheets against the record the work belongs to.

Stalled-project signals

See the time a record spends in each phase, the milestones that tasks miss, and the last experiment on each project.

One connected data model

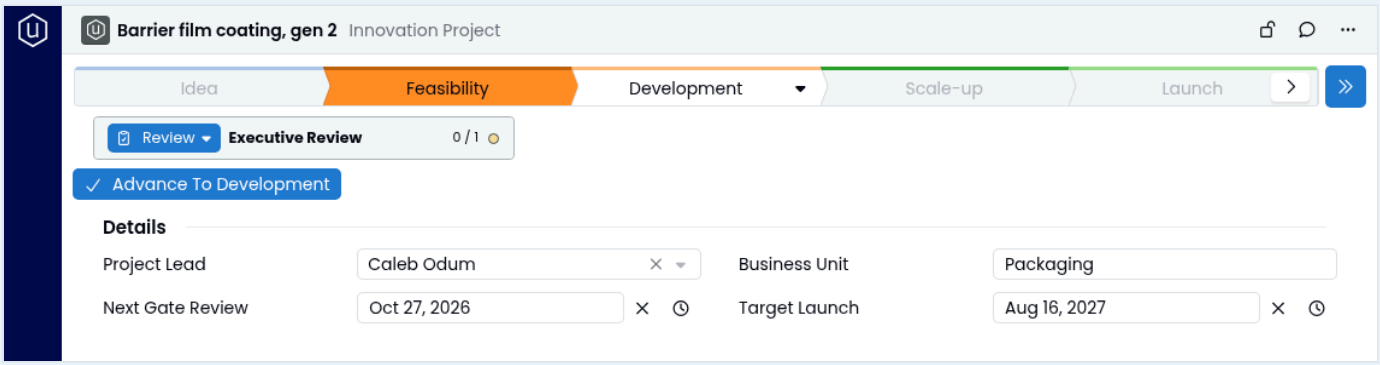
Requests, tasks, specs, products, and notebooks link to their project. The external API reads projects and moves records between phases.

Gate reviews on the project record

Each gate decision happens on the project record, next to its data.

AT THE GATE
A project is ready to leave its feasibility phase.

DECISION
Reviewers approve and advance it, or reject it, in the record.



A project at its feasibility gate, with its executive review and the next phase.

BODIE AI AGENT

Ask Bodie to find projects, build a listing, create records from a spreadsheet, or move a record to its next phase.

Bodie runs in your tenant, and formulation data never trains foundation models.

See it on your own portfolio
