

Plan R&D projects with cost and market context

Planning and pricing, market intelligence

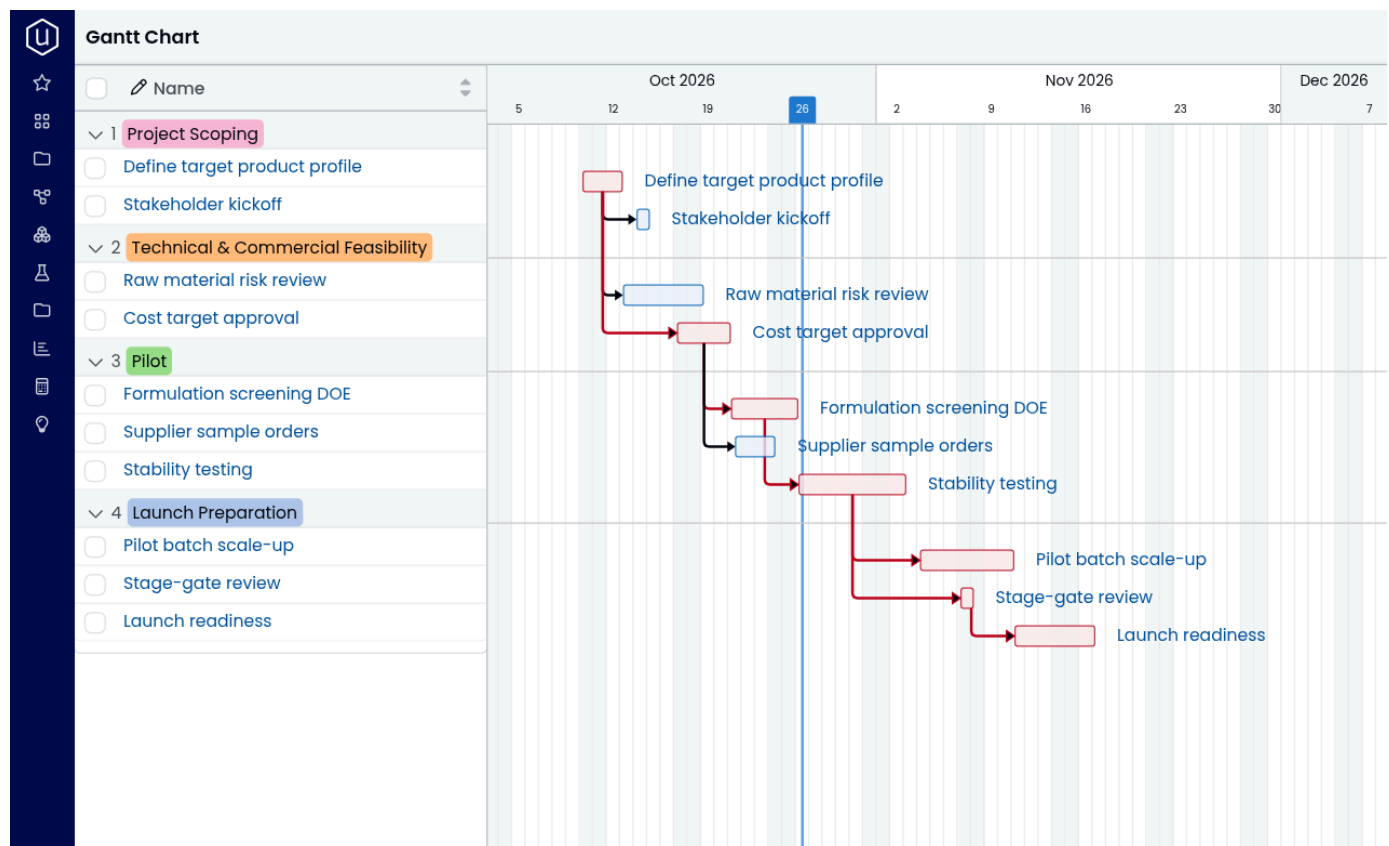

Schedule project work with dependencies and a critical path, track cost in 30 currencies, and research the market with Bodie AI Agent.

Gantt chart

See the full project schedule

Plan every task on one timeline, from scoping to launch readiness.

Phases

Tasks group by workflow phase, from scoping to launch.

Dependencies

Arrows link each task to the tasks that wait on it.

Critical path

Red bars mark the chain of tasks that sets the finish date.

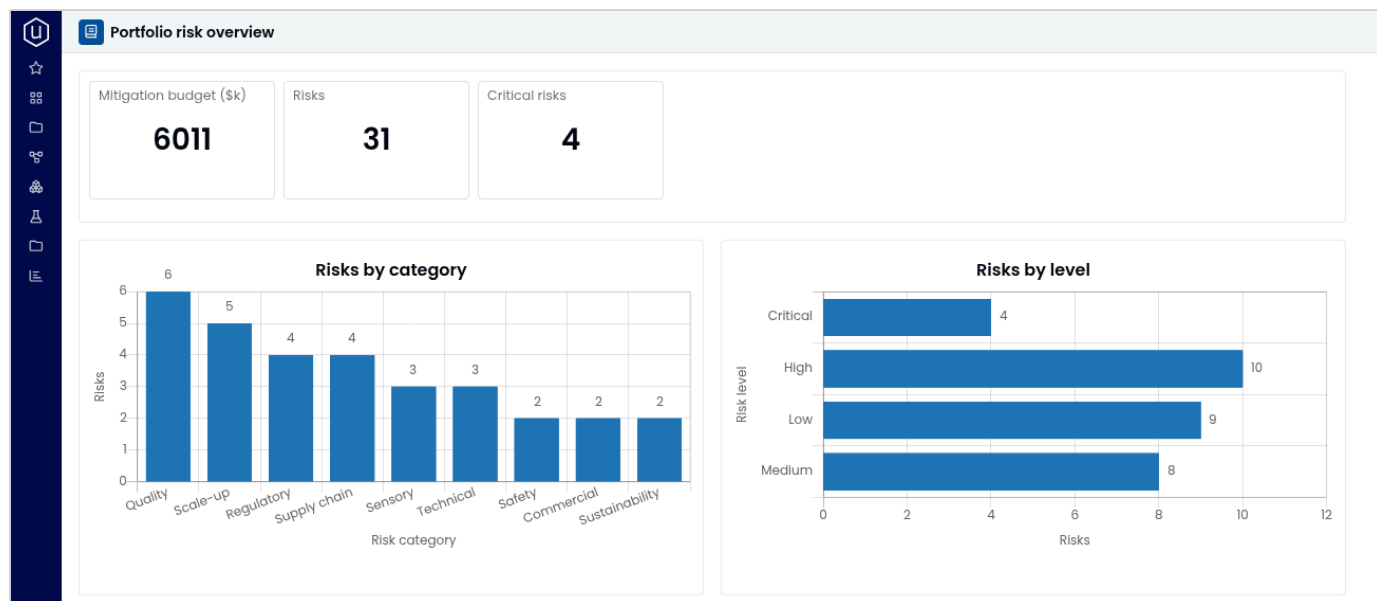

Uncountable's AI-native end-to-end platform is deployed by 175+ product development teams.

Capabilities

From project plan to market context

Plan the work, track budgets and risk, and research the market in one platform.

KPI cards and charts summarize all risk records in one dashboard.

Planning

Gantt chart

Link dependent tasks and highlight the critical path.

Stage-gate phases

Move projects through phases with reviews and approvers.

Portfolio dashboards

Track risk, budget, and status across projects with KPI cards and charts.

Project scoring

Calculate a score from project fields with a trigger, and rank by score.

Resource timeline

See bookings for each person and instrument by week or month.

Pricing

Currency and exchange rates

Store costs in 30 currencies with daily European Central Bank rates.

Formulation cost and margin

Calculate cost from ingredient unit costs, and margin from a price field.

Cost limits in DOE

Put a bound on cost per kg when the platform designs experiments.

Budget and spend

Record budget and actual spend in currency fields, and total them.

Price quotes

Keep price quotes as records with currency fields, linked to products.

Market intelligence

Bodie AI Agent web search

Search news and research papers by date range, with linked sources and user approval.

Trusted sources

Limit web search to patent, literature, regulatory, and supplier sites.

Ingredient research

Get a web-researched summary and alternative ingredients with CAS numbers.

Competitor tracking

Keep competitor products as records, and research them with web search.
