### Example Measurement Survey Report

Dear Mr. Smith

Thank you for allowing us to complete the Wi-Fi upgrade at your property. The report below shows the speed test results taken before the upgrade, and the results afterwards.

#### 1. Project Summary

Our team conducted detailed before and after on-site surveys including speed testing, signal strength analysis, security check and infrastructure inspection across all areas of the property.

#### 2. Key Findings

##### Wi-Fi Issues:

- Weak signal in certain rooms
- Slow Internet Speed,
- Too much Buffering on TV Streaming

##### Cabling Issues:

- Outdated house cabling
- Untidy Network Rack
- Some broken cables on wall sockets

#### 3. Measurement Results

This table below shows the download and upload speed test results. You can see that all areas of the property have significantly improved following the upgrade.

Location	Download/ Upload Before Work (Mbps)	Download/ Upload After work (Mbps)
Router Room	280/300	790/801
Living Room	40/45	700/708
Kitchen	43/44	599/601
Dining Room	51/55	701/703
Upstairs Hall	31/33	670/677
Master Bedroom	41/42	662/667
Bedroom 1	47/49	801/888
Bedroom 2	37/39	701/704
Bedroom 3	67/69	601/621
Office/Guest Room	0/0	654/666

#### 4. Implemented Solution

To address the identified issues, we have implemented a structured wired network backbone with upgraded components and new Access points around the house.

- Install 16-port PoE rack-mounted switch and tidy up the rack and router position.
- Install WiFi 7 Mesh 3 hub mesh system and access points via CAT 6a Cabling.
- Organize cabling and connections using trunking as requested by client.
- Add an extra Access Point so the garden area could be covered.

#### 5. Contact

If you would like any clarifications regarding this Report, please don't hesitate to contact me.

Kind regards,
