

A modern, minimalist living room with a white sofa, a large wooden bookshelf, and a glass-enclosed lift. The room features a large window on the left, a patterned rug, and a low coffee table. The lift is located on the right side of the room, with a glass door and a wooden frame. The text "ECO HOME LIFT" is overlaid in the center of the image.

ECO HOME LIFT

vimec PREMIER

ECO HOME LIFT

The Eco Home Lift is designed to bring comfort, elegance, and sustainability into your living space. With many personalisation options to choose from, our Eco Home Lift is a great addition to any home.

SPEED : 0.15 M/S

The ECO Lift offers smooth consistent speed between floors and is in conformity with machinery directive 2006/42/CE.

LOW PIT & HEADROOM REQUIREMENTS

Pit required can be as low as 120mm* or ramp can be provided. Minimum headroom from the top floor FFL can be an industry leading 2450mm*.

TRACTION & HYDRAULIC DRIVE OPTIONS

Drive options that are suited to the user and building requirements. We work with you to provide the best option.

RATED LOAD: UP TO 500KG *

Different drive options offer the opportunity to increase capacity of our ECO Lift for the most intensive uses.

TRAVEL: 5 STOPS (14.6M) *

Suitable for most residential and public spaces with a simple, fast installation.

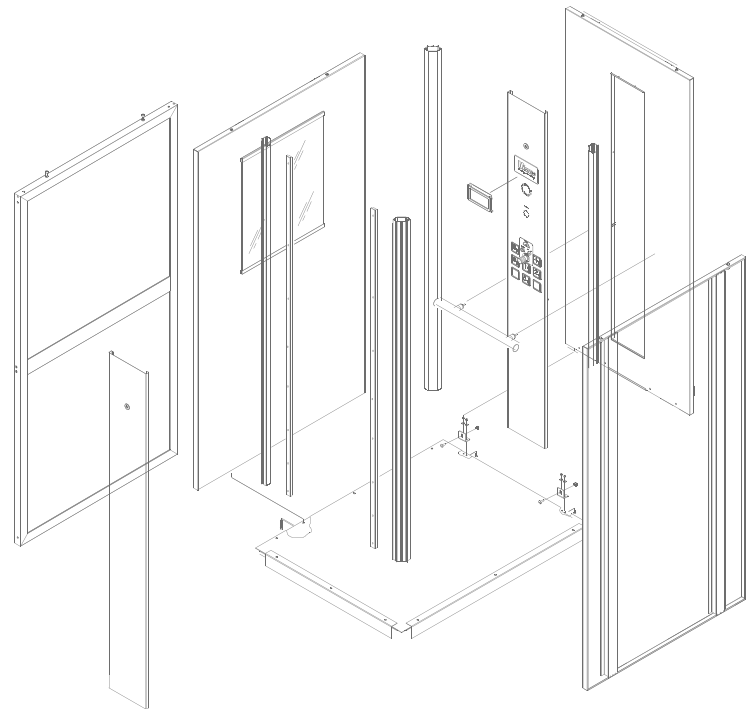

MEETS ALL LEGISLATION REQUIREMENTS

All of our products comply with Europe's strictest safety requirements. Ensuring safety with the latest EC directives.

* These are possible min/max values, certain drive and building requirements may limit values. See brochures technical pages or contact a sales specialist for more information.

THE DESIGN OF THE ECO LIFT

SUSTAINABLE HOME LIFT SOLUTION

The Eco Home Lift is designed with energy efficiency in mind, using eco-friendly materials and minimising energy consumption to reduce its environmental impact.

ADVANCED LIFT TECHNOLOGY

Next-level innovation with intuitive controls and top-tier safety features, offering an effortless user experience every time.

FLEXIBLE UPGRADES

Redesign your home lift's cabin walls anytime, without needing to replace the entire system. The Eco Home Lift evolves with your home's changing design.

STRUCTURES FOR INDOOR AND OUTDOOR USE

Our lifts can be provided with highly customisable structures. They are modular in design with different types of glass panelling to suit installations of all kinds and provide support when masonry work is unavailable.

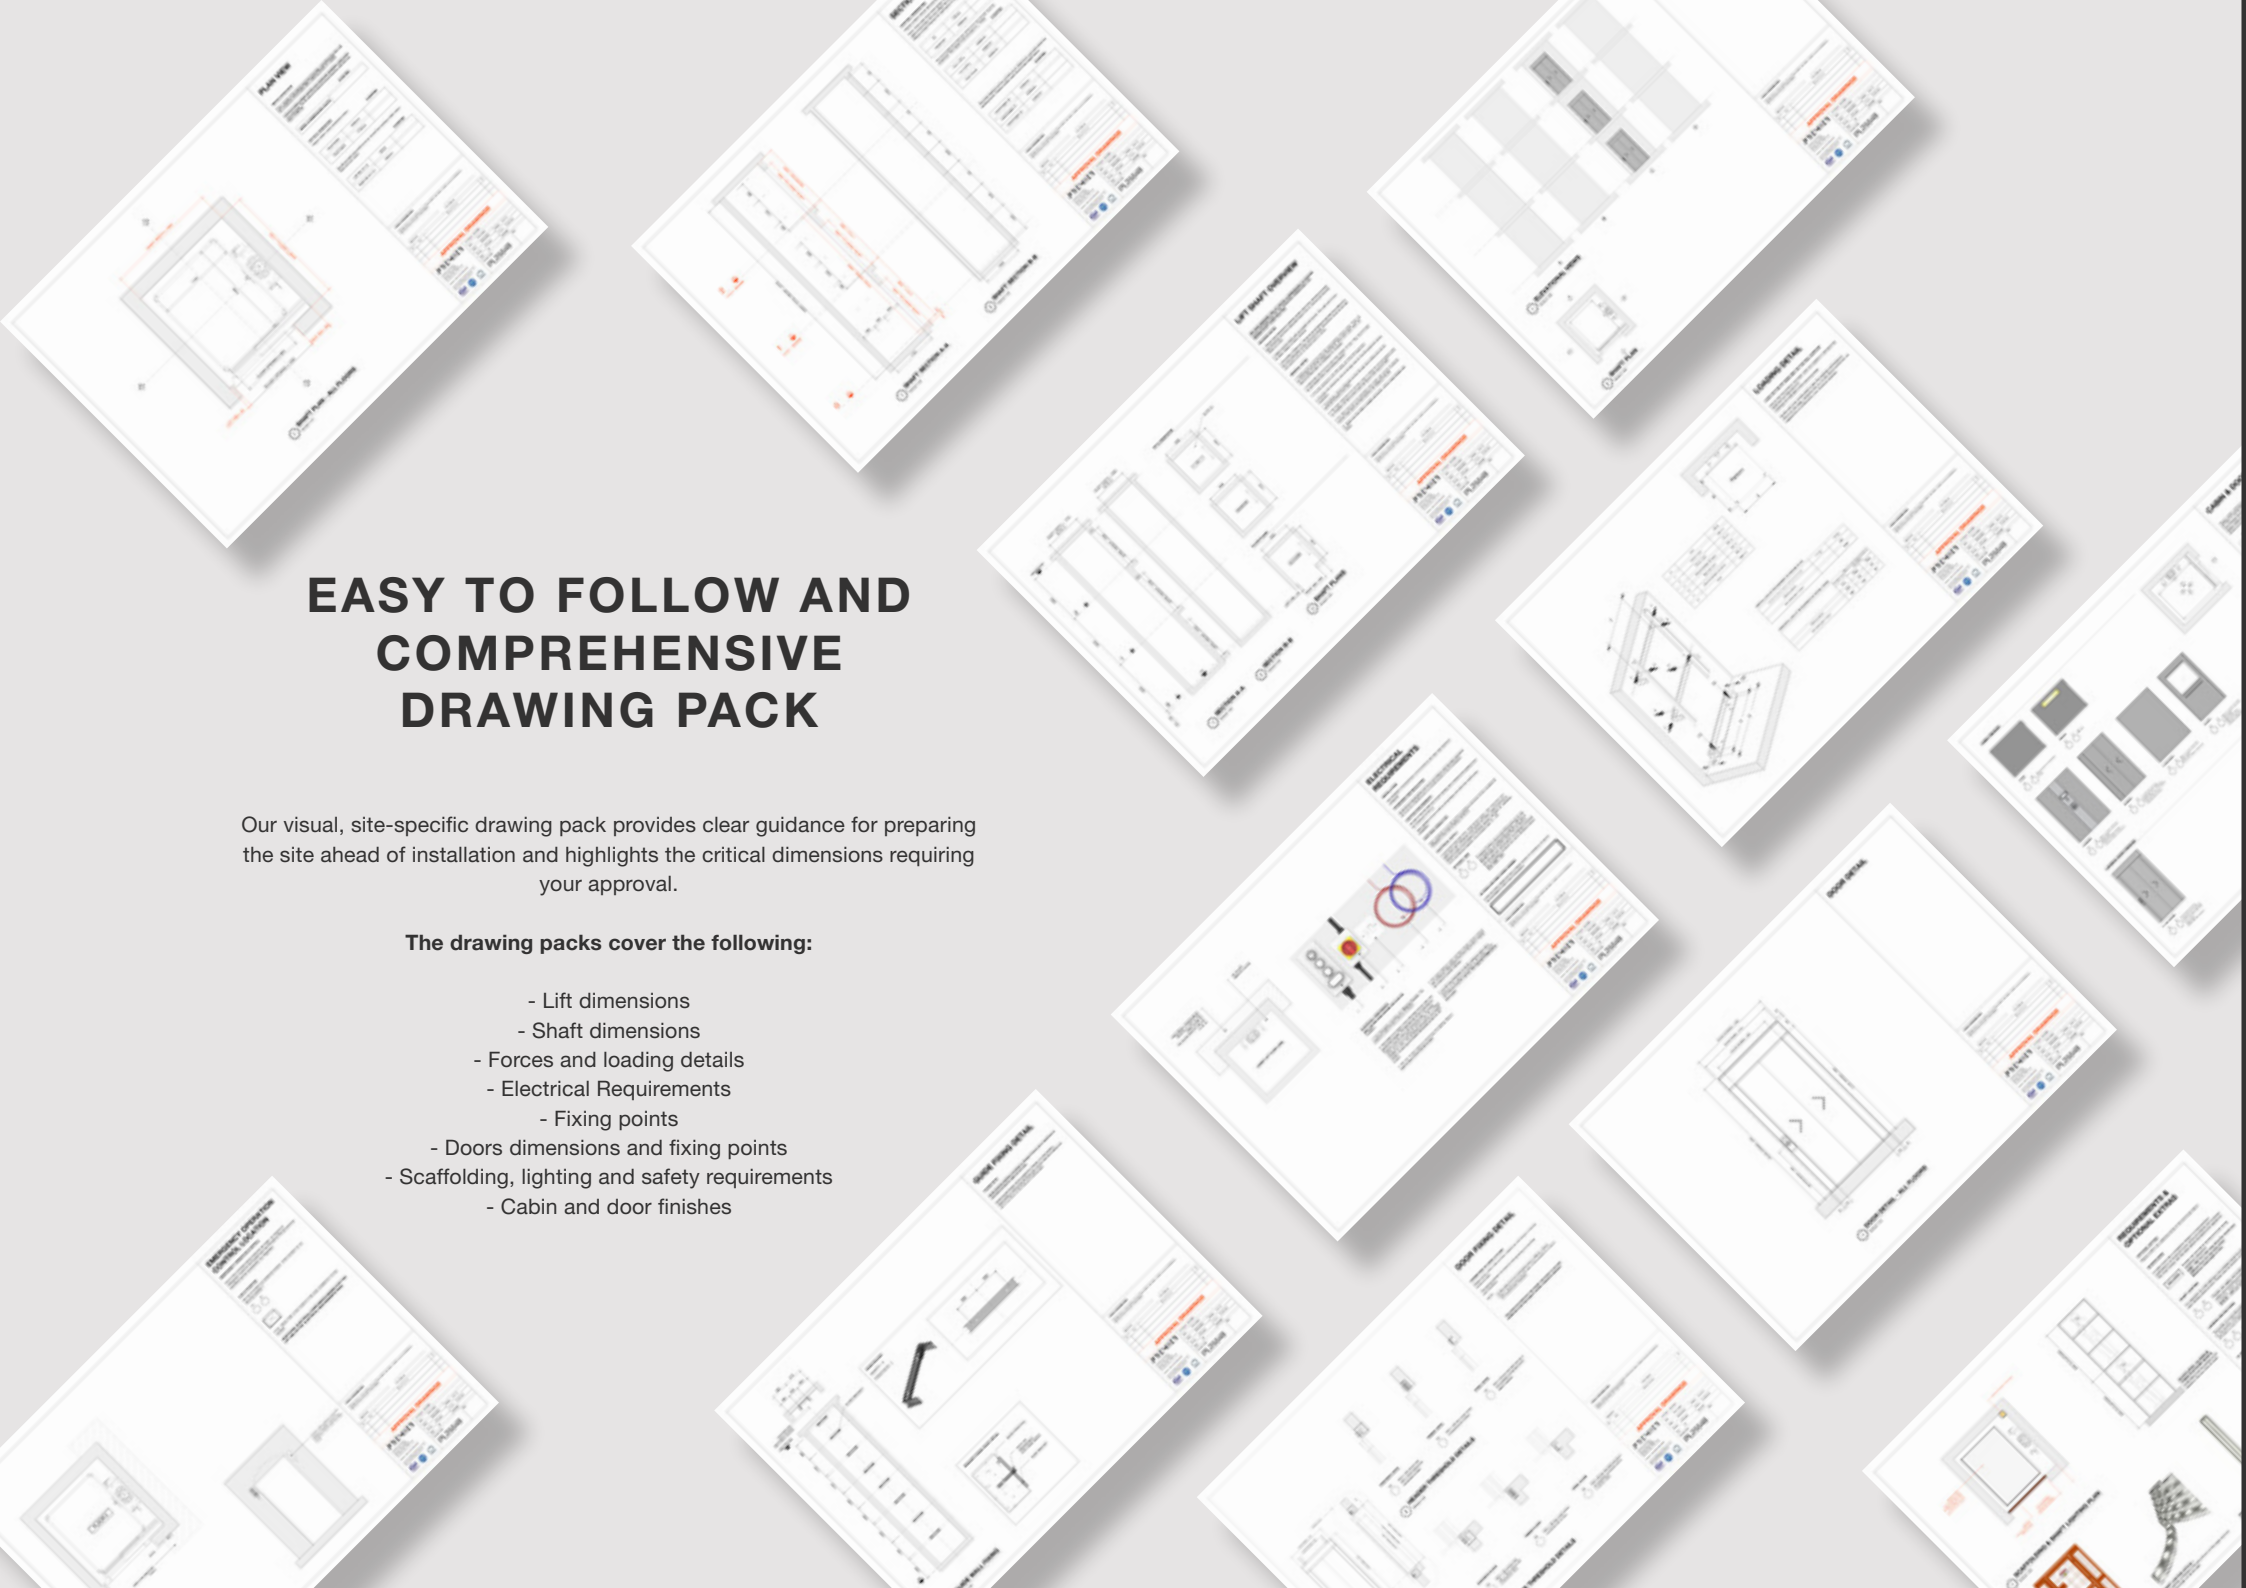

Our skilled engineering team ensures installation is completed quickly with great care to the surrounding environment.

INSTALLATIONS IN HOMES ACROSS THE UK

We take a personal approach to each project. From bespoke technical drawings to swift and tidy installation, we strive to ensure that all your requirements and ideas are reflected in the finished product.

Installation is simple and efficient, requiring minimal structural work. Our process limits disruption to your home, helping daily life continue with minimal interruption.

EASY TO FOLLOW AND COMPREHENSIVE DRAWING PACK

Our visual, site-specific drawing pack provides clear guidance for preparing the site ahead of installation and highlights the critical dimensions requiring your approval.

The drawing packs cover the following:

- Lift dimensions
- Shaft dimensions
- Forces and loading details
- Electrical Requirements
 - Fixing points
- Doors dimensions and fixing points
- Scaffolding, lighting and safety requirements
- Cabin and door finishes

STRUCTURE FINISHES

EXPERT POWDER COATED SURFACES IN ANY RAL COLOUR

When a more specific finish is needed, we offer electric powder coated RAL colours. Our powder coated surfaces can be more resistant to chipping, scratching, fading, and wearing than other finishes, meaning it is extremely durable. The process is also environmentally friendly as virtually no pollutants are released into the air.

HANDRAIL

The Eco Public Lift comes as standard with a matt black aluminum handrail – finish similar to the cabin profiles - can be installed as option.

The length of the handrail varies based on the length of the wall where it is installed (it is fixed to the cabin profiles).

VISION PANEL

LARGE VISION PANEL

CABIN OPERATING PANEL (COP)

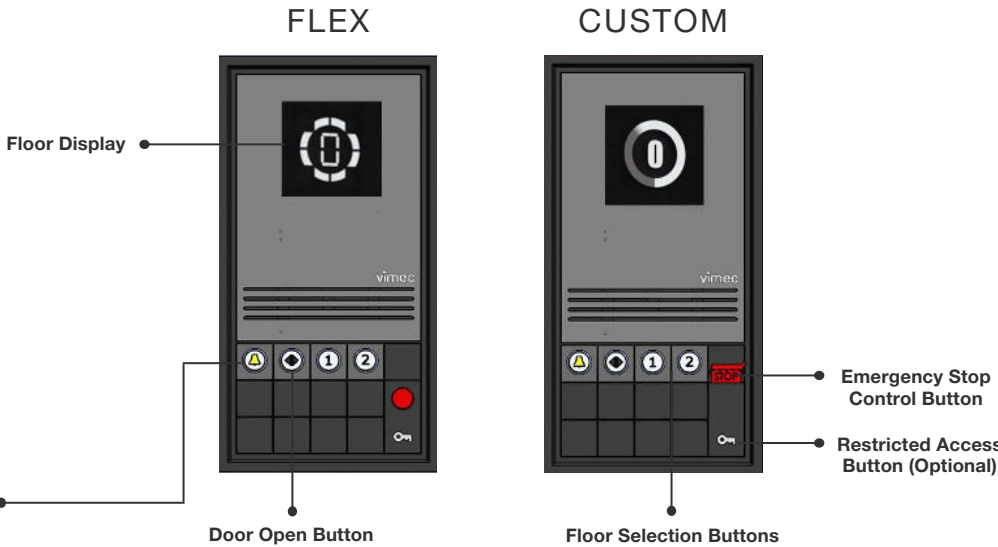

This COP is manufactured in the same finish as the selected cabin wall cladding as standard, ensuring a seamless integration with the cabin interior. Alternatively, the COP can be specified in a contrasting finish to complement bespoke design requirements.

Mounted within the central cabin wall panel, the COP incorporates all essential lift controls, and integrated autodialler communication system.

All push buttons are tactile, and feature illuminated visual indication to enhance usability and accessibility. The panel is designed to provide intuitive operation while maintaining compliance with applicable accessibility and safety requirements.

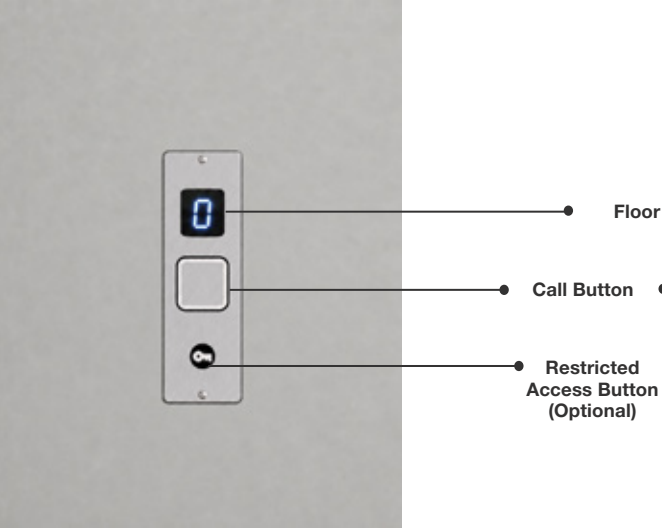

The COP is created in matte black finish, matching the corner profiles and skirting. The overall size of the COP is 300 mm by 565 mm, this is mounted on the central wall panel, with a 22 mm protrusion for a sleek and unobstructive design.

The buttons feature blue backlighting, with the alarm button illuminating yellow backlight. The bell and door opener buttons remain illuminated at all times.

LANDING OPERATING PANEL (LOP)

This LOP is manufactured in titanium and features a floor display, a rectangular tactile mechanical button with green backlighting when available and red when the lift is occupied.

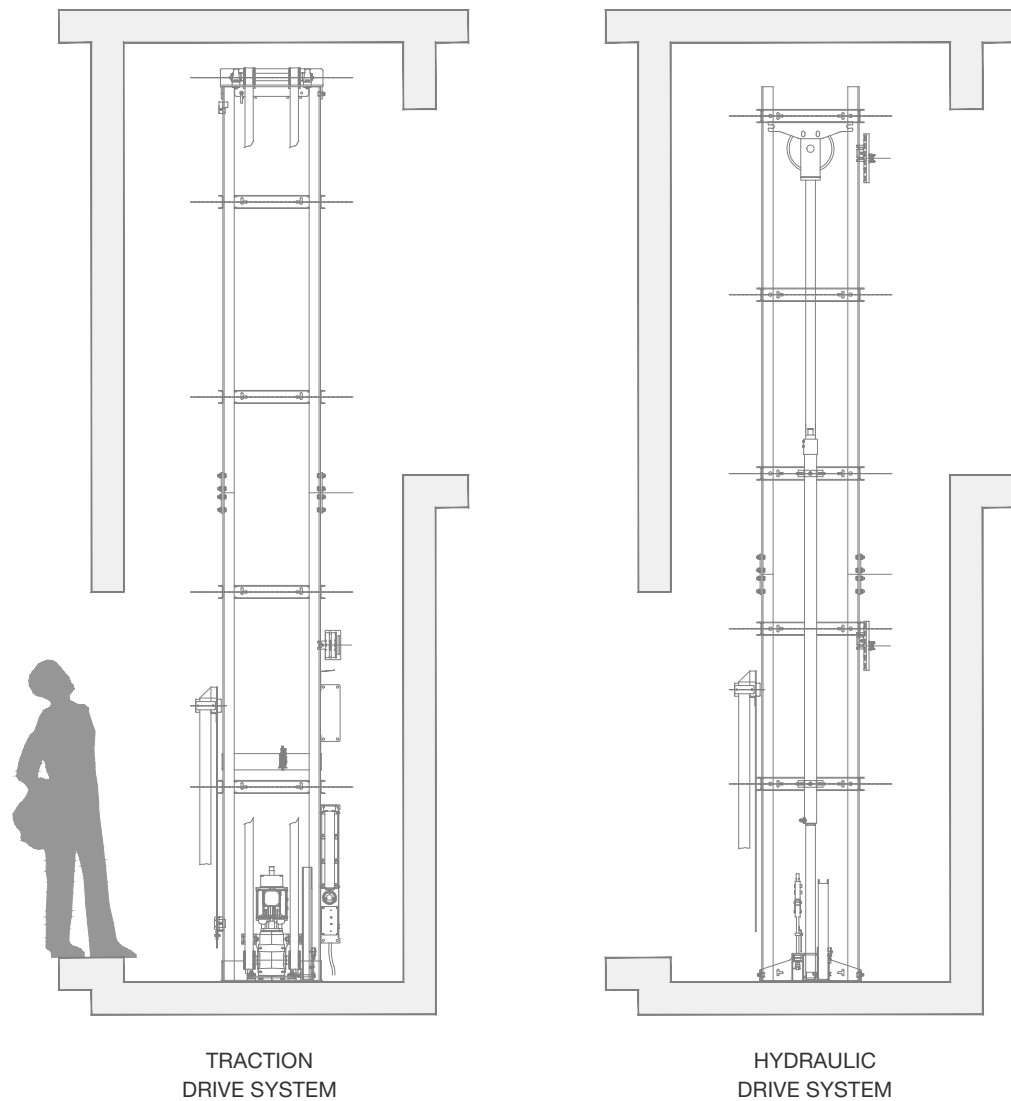

The lift is called with a single touch, and the design mirrors the internal cabin button panel.

The black LOP features a single circular button with green backlighting when available and red when the lift is occupied. The standard button panel is constructed from 34 mm thick plastic material.

An optional LCD floor display can be included, and where access control is required, a silk-screened key symbol indicates activation via magnetic card.

DRIVE OPTIONS

Our electric traction lift is suitable for most home and public applications. The belt drive traction system ensures that this through-floor lift is almost silent in operation, which is achieved by just one touch of a button, exactly the same way as a passenger lift.

For a greater capacity or specific use cases, we offer a hydraulic drive system that easily accommodates every load.

We work with you to ensure the choice you make is the right one.

DIMENSIONS & OVERALL SPACES

The Eco lift cabin be designed to meet your exact requirements. Please contact a member of our sales team for more information.

METAL STRUCTURES FOR EXTERIORS

THE HOME LIFT SOLUTION IS AVAILABLE BOTH FOR MASONRY SHAFTS OR WITH METAL STRUCTURES SUPPLIED DIRECTLY BY VIMEC. VIMEC HOME LIFTS CAN BE INSTALLED BOTH INSIDE A HOME AND OUTDOORS.
