## WORK EXPERIENCE

### Albertsons | Senior Product Designer

New York, NY | May 2022 - Present

- Led end-to-end product design for *Cost Management* and *Competitive Pricing*, delivering enterprise tools with established business demand and active usage across complex merchandising, cost-negotiation, and pricing workflows
- Designed data-intensive enterprise experiences spanning financial forecasting, planning, and performance analytics, including hierarchical navigation, bulk editing, complex tables, drill-down heatmaps.
- Bridged design and engineering through AI-assisted development workflows, contributing production-ready front-end code that accelerated iteration from design concepts to shipped features.

### The Home Depot | Senior UX Designer, contract

New York, NY | Feb 2021 - May 2022

- Led end-to-end UX for One-Viz, a supply chain visibility platform, from user research and product strategy through concept validation, MVP definition, and UI delivery; identified opportunities in data integration, customizable views, and facility-level updates.
- Led the redesign of PFS 2.0 to improve product-safety record review efficiency, supporting the successful retirement of the legacy system and transition to the new platform.

### Walmart Labs | Product Designer

Bentonville, AR

Online Grocery team | Jan 2020 - Dec 2020

- Owned the picking experience for Walmart's online grocery fulfillment app, leading a mobile redesign that improved item-location workflows, reduced fulfillment errors and training effort; evaluated the solution through in-store A/B testing.

Pricing team | Oct 2018 - Dec 2019

- Designed and shipped features for Walmart's enterprise pricing system, using user research and usability testing to inform product decisions and improve tool adoption; facilitated a six-week concept sprint for Pricing Simulator, a future vision for retail decision-making and execution.

## EDUCATION
