

# Trevor Sullivan

## Product Designer

For the past 8 years, I have obsessed over crafting visual interfaces and experiences that are simple and accessible to all. As a self-taught designer, I have dedicated myself to all things design by reading books and articles, listening to podcasts, watching YouTube videos, attending conferences, and reaching out to other designers for advice and feedback.

### EXPERIENCE

#### **Modern Animal** | Product Designer

November 2020 - Present

Los Angeles, CA

I am currently working on our customer facing app (iOS & Android) and EMR (Electronic Medical Record) for our in-clinic care team.

#### **Fundomate** | Product Designer

November 2018 - March 2020

El Segundo, CA

Worked in constant collaboration with stakeholders, users, product managers, and engineers from inception to production on various design projects. Designed and launched our flagship product - the "Merchant Capital Application" that automates the underwriting process for small business funding. Worked alongside two engineers to build out a scalable design system in Sketch & React.

#### **The Camera House** | Web Designer

January 2016 - January 2017

North Hollywood, CA

Spearheaded the website and brand redesign process of a struggling small business. Conducted competitive analysis and user research to design a unique website that stood out from industry competition. Assisted in the development, planning and execution of advertisement campaigns on various social media platforms.

#### **Freelance** | UI/UX Designer

January 2014 - September 2020

Los Angeles, CA
