Pantry

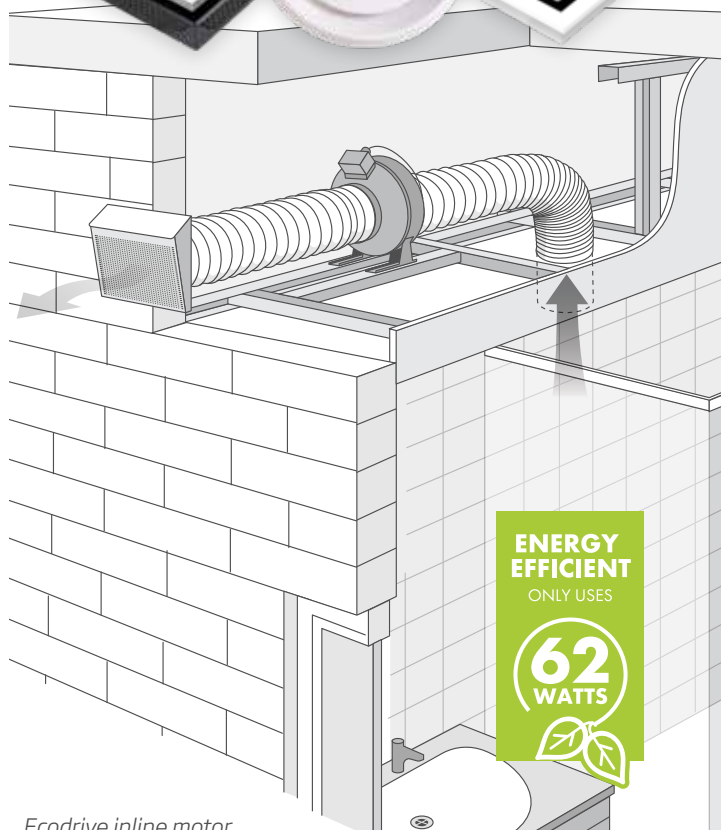

Cellar

Silent Exhaust Fans can be installed and vented to 2 adjacent rooms with optional venting kits

- **Powerful silent extraction by** Ecodrive motors (recognised as one of the most powerful and efficient domestic air extraction systems available) - requiring just 62 watts of power to run and delivering almost 300% energy savings in comparison to competitor products.
- **Multi-purpose ventilation** suitable for use anywhere in the house to remove steam from bathrooms, odours from toilets, condensation from laundry rooms, stale air from bedrooms, garage, wine cellar and more.
- **Multi-room extraction** from just one exhaust fan with whole of house multi-room models and venting kits now available in easy-to-install bundles.
- **Up to 850m³/h** of Powerful Extraction. Keeping your home cleaner and fresher for longer
- **Flexible installation** through the roof, wall or inline of your apartment, townhouse, single or multi-storey house.

Ecodrive inline motor

Experience powerful, Silent ventilation designed to keep your home fresher, healthier and more comfortable by quickly removing steam, humidity, odours and stale air.

Ideal for bathrooms, ensuites, laundries and other wet areas, the range features a sleek 200mm round adjustable ceiling vent for a clean, discreet finish and greater control over airflow.

Powered by Schweigen's energy-efficient Ecodrive technology, the range is available with either an external or inline motor, with options for single or dual-room ventilation to suit different home layouts and installation requirements.

For added peace of mind, Schweigen's Silent external motor is BAL-40 certified, making it suitable for installation in bushfire-prone areas. Powerful extraction. Energy-efficient performance. Schweigen Silent comfort.

ECODRIVE® OPTIONS

BR550, BR552 - External motor

- 200mm flexi ducting (4m)
- install roof/wall
- optional twin room available

BL500, BL502 - Inline motor

- 750 m³/h airflow
- 150mm flexi ducting (6m)
- install in roof cavity or bulkhead
- optional twin room available

ECODRIVE® OPTIONS

BRW650, BRW652 - External motor

- 850 m³/h airflow
- 200mm flexi ducting (4m)
- install roof/wall
- optional twin room available

BLW600, BLW602 - Inline motor

- 750 m³/h airflow
- 150mm flexi ducting (6m)
- install in roof cavity or bulkhead
- optional twin room available

Bring a cleaner, more refined look to home ventilation with Schweigen's square-vent exhaust fan range, combining strong extraction performance with a sleek architectural finish.

The 300mm square vent sits neatly within the ceiling and uses a perimeter aspiration design to draw air effectively from around all four edges. It's an ideal solution for bathrooms, ensuites, laundries and other areas where moisture, steam and odours need to be removed efficiently.

At the heart of the range is Schweigen's energy-efficient Ecodrive technology, available with either an external or inline motor and in single or dual-room configurations for greater installation flexibility.

External motor models also feature Schweigen's BAL-40 certified Silent motor, making them suitable for homes in bushfire-prone locations. Sleek design. Powerful airflow. Energy-efficient, Silent performance.

Achieve powerful ventilation without compromising your interior design. Schweigen's integrated vent range is designed to blend seamlessly into the ceiling, creating a refined, architectural finish while efficiently removing steam, humidity, odours and stale air.

The 313mm square plastered-in vent features a discreet integrated design with perimeter aspiration, drawing air around the edges for effective extraction while maintaining a clean, minimalist appearance.

Powered by Schweigen's energy-efficient Ecodrive technology, the range is available with either an external or inline motor, along with single or dual-room configurations to provide greater flexibility across different home designs and applications.

External motor models also feature Schweigen's BAL-40 certified Silent motor, providing added peace of mind for homes in bushfire-prone areas. Seamless integration. Powerful extraction. Energy-efficient, Silent performance.
