

<b>Manufacturer</b>	Rototilt
<b>Model</b>	R6
<b>Condition</b>	Rebuilt
<b>Installation</b>	Installed at your facility
<b>ICS Control System</b>	Joysticks and display in cab
<b>Multi Upper</b>	Can be adapted to fit 15-24 ton excavators
<b>PG80 Coupler</b>	80mm Pin Grabber
<b>Price</b>	POR based on excavator and installation required

Nearly everyone who has run a tiltrotator won't run an excavator without one again...and payback on a tiltrotator is fast. This unit is a great value compared to a new one subject to tariffs. We can set up a complete package on your excavator including installation, training, and ongoing support. We can also provide attachments to fit the Rototilt like buckets, grapples, etc. Has two auxiliary functions that can power hydraulic attachments like grapples through the continuous rotation coupler.

*\*Actual unit is not pictured*
