## Quarterly Commentary

The final quarter of 2025 capped a wild ride for financial markets. After a bullish start to the year, stocks suffered a 20% correction either side of 'Liberation Day', only to then push to new all-time highs. The rise of AI and associated infrastructure build-out remained a hot topic, with the US tech giants at the epicentre, however US stocks lagged the strong gains seen from equities in Europe, Asia and emerging markets. Fixed income enjoyed a steadier year despite increasing scrutiny around G7 debts and deficits. US Treasuries stabilised while yield curves steepened and global policy paths diverged. Corporate credit fared well on the back of solid fundamentals, low default rates and strong investor demand. Meanwhile, precious metals soared on a combination of fiat currency debasement fears and a broader market rotation towards scarce assets.

The strategy was up 2.0% in the fourth quarter, leaving the mandate up 2.5% for 2025. More broadly, our Sustainable strategies delivered their best year since 2020 despite a plethora of policy headwinds and highly negative sentiment, as key sectors such as renewables rebounded strongly from Q2 lows. Key contributors in Q4 included The Royal Mint Responsibly Sourced Physical Gold ETC (see [Featured Fund](#)), up 13.8%, Lombard Odier TargetNetZero Europe Equity, which gained 6.4%, and Aikya Global Emerging Markets, up 5.6%.

We added Schroder Sustainable Global Value to the portfolio during the quarter, as a dedicated value equity allocation.

As part of Capital International (Jersey) Limited's (CIJL) association with Durrell Wildlife Conservation Trust (DWCT), we have committed to donating a portion of the investment management fees earned in this strategy, managed by CIJL, to DWCT.

## Themes

## Featured Fund

**The Royal Mint Responsibly Sourced Physical Gold ETC** provides investors with safe and ethical exposure to the spot price of physical gold, combining institutional-grade security with responsible sourcing and convenient market access. The ETC is 100% physically backed by allocated gold bars that meet the London Bullion Market Association (LBMA) post 2019 Responsible Sourcing standards, all securely stored in The Royal Mint's high-security vault in Llantrisant, Wales. There are no bars of Russian origin, and the product targets at least 50% recycled gold, significantly reducing the carbon footprint relative to newly mined gold. Issued by HANetf ETC Securities plc, 'RMPH' is an exchange-traded commodity (ETC) structured as a debt security and listed on the London Stock Exchange. Uniquely, investors also have the option to redeem holdings for physical gold bars or UK bullion coins through The Royal Mint.

We allocated to this ETC in our Sustainable strategies earlier in 2025, wanting to express our high conviction views around scarce assets, including precious metals, through a vehicle which did not compromise the integrity of the mandate. It has since been a leading contributor within our Sustainable portfolios, and gold's low correlation with other risk assets should also make it a valuable diversifier in the long-term.
