

# My Implant Journey Begins

You've thought about placing implants for years, however something is holding you back?

2022 My Implant Journey Begins, is the perfect educational opportunity for you to evaluate, is it time to start placing implants? During this course, you will learn the surgical steps necessary in predictably achieving excellent clinical outcomes for your patients, your team and your practice. Our presenter will share what sparked him to start his implant placement journey and the exact path he followed. He will share his early surgical cases through the advanced cases he is providing today. Besides the clinical satisfaction he enjoys, we will also learn the profitable side too. The evening will end with identifying with how you can start your journey.

## Dr. Jordan Colby

Dr. Colby began placing implants in 2018 and it changed his career! After he had placed about 100 implants, he learned the "all on X" technique and for the first time was able to deliver teeth in a day! The ability to remove diseased teeth, gums and bone and simultaneously place implants that allow the patient to walk out with a big smile is absolutely incredible!! His unique approach in presenting, helping patients feel comfortable and accepting treatment is what sets his offices apart. Dr. Colby Averages 3-4 full-arch surgeries per month. Dr. Colby is currently teaching full-arch surgeries and the art of treatment presentation for Megagen America and the 4M implant institute in Long Beach California. Since implementing what Dr. Colby teaches his practices have seen immense growth and he is so excited to share that with you! Dr. Colby is passionate about sharing what he has learned to help others elevate their practice and find more joy in their careers!
