Solutions for Implant Restorative Challenges with Edentulous Arches and Single Tooth Replacement

Course Description

The placement and restoration of dental implants into the biologic network of partially and fully edentulous patients presents numerous challenges. Although the esthetic mimicry of natural teeth may be convincing, the pathway to success may be complex as the implant and abutment are surrounded by a matrix that continually evolves. In addition, the restoration of today may be unsatisfactory or inadequate tomorrow so both the clinician and patient benefit by a restorative workflow that maximizes the quality of the restoration and allows for correction as time passes.

By using state of the art technology with which we can seamlessly adopt a digital process that partners with our supporting laboratory and provides our patients with implant-based solutions which incorporates function, esthetics, health, durability and ... retrievability.

Learning Objectives

At the conclusion of the seminar, participants will be able to:

- Understand the strengths and limitations of current restorative materials and methods for full-arch implant restoration
- Recognize which treatment modality addresses the needs unique to a patient
- The challenges of making the fully artificial co-exist with natural teeth
- How to design implant crowns for today and to meet the needs of tomorrow.

Featured Speaker

Dr. Mark Montana

Dr. Mark Montana is a 1987 graduate of the University of Southern California School of Dentistry and completed his Certification in Advanced Prosthodontics at USC in 1989. He has been primarily involved in private practice since 1989 in Tempe, Arizona; emphasizing fixed, removable and implant prosthodontics. Dr. Montana is a former clinical instructor while attending USC, as pre-clinical instructor at the Arizona School of Dentistry and Oral Health and as a clinical instructor and lecturer in the graduate clinic at ASDOH. He has lectured extensively, both domestically and internationally on the topics of implant, fixed and removable prosthodontics as well as dental wear. He has written articles on implant restoration and co-authored a chapter on dental wear in a recently published text. He has served on several of his states' dental committees. His membership to professional organizations include: The American College of Prosthodontics, the American and Arizona Dental Associations and the Academy of Osseointegration. He is a former member of The Pacific Coast Society for Prosthodontics, The American Academy of Fixed Prosthodontics and the American Prosthodontics Society.
