AN ESTHETIC CHAIRSIDE ZIRCONIA FOR COMPREHENSIVE RESTORATIVE DENTISTRY

3CE

PROVIDED BY
PATTERSON DENTAL

COURSE DESCRIPTION:

Mastering chairside zirconia restorations is no longer a luxury—it's a necessity. This dynamic study club session dives deep into the art and science of esthetic zirconia, empowering clinicians to deliver stunning, durable results with confidence and efficiency.

Participants will explore the full spectrum of restorative excellence, beginning with smart case selection and the critical diagnostic records that set the stage for success. Incorporating technologies, Dr. Apekian will walk you through the nuances from preparation, pre- and post-mill contouring, to the subtle artistry of staining and glazing. She will share her own successful bonding protocols to ensure predictable outcomes every time.

Whether you're refining your technique or just stepping into the world of chairside zirconia, this course offers clinical pearls that elevate your restorative game.

OBJECTIVES:

- Understand case selection and identify proper diagnostic records for success
- Discuss preparation, pre and post-mill contouring, staining and glazing techniques, and bonding protocol for beautiful and consistent outcomes
- Discuss common tips and tricks for improving esthetics

JENNY APEKIAN D.D.S.

dentistry. *art* technology

DR. JENNY APEKIAN

Dr. Jenny Apekian is a proponent of utilizing the latest CAD/CAM, 3D imaging, 3D printing and treatment delivery systems and technologies in dentistry to improve the patient experience. As an accomplished artist, she utilizes those same skills in finalizing restorations for full arch or full mouth rehabilitation cases in her Sacramento practice. A key opinion leader for various DENTSPLY Sirona technologies, Dr. Apekian serves as a mentor and trainer for CEREC CAD/CAM technology throughout the Sacramento region. She also speaks nationwide on how to maximize efficiency through office design and organizational workflows. She recently accepted the Smart Integration Award honoring innovative women in digital dentistry.
