MASTERING ZIRCONIA BONDING: THE ESSENTIAL GUIDE TO CAD/CAM CERAMIC RESTORATIONS

COURSE DESCRIPTION:

Advances in CAD/CAM, ceramics, and adhesive bonding have expanded the possibilities for esthetic, minimally invasive, and long-lasting treatment.

This presentation provides a science-based clinical update on material selection, digital workflows, preparation techniques, and bonding protocols for veneers, onlays, crowns, bridges, zirconia restorations, and implant-supported cases. Topics include digital smile design, immediate dentin sealing, deep margin elevation, minimally invasive preparation, and evidence-based adhesive dentistry, from adhesive bonding to zirconia.

OBJECTIVES:

- Differentiate modern ceramic materials and their indications.
- Learn about CAD/CAM technology and its diverse applications in esthetic dentistry.
- Understand strategies for success with ceramic restorations for teeth and implants based on current scientific evidence.
- Comprehend clinical guidelines for long lasting resin bonded esthetic restorations, from laminate veneers and onlays to resin bonded bridges and implant supported restorations.
