CONTINUOUS PENTESTING

AI-POWERED. HUMAN DRIVEN.

Our AI + Human expertise mimics real adversaries, uncovers risk early, and prioritizes what matters most to your business.

The Power of Continuous Threat Exposure Management (CTEM)

Continuously uncover and reduce digital attack exposure with proactive discovery, human-in-the-loop validation and actionable insights across all assets.

Attack Surface Management (ASM)

Continuously map your external attack surface using automated recon techniques and expert validation, delivering accurate, actionable visibility into assets, exposures, and potential attack paths.

Continuous Pen Testing (CPT)

Combine automated testing at scale with expert offensive security validation to identify vulnerabilities, measure control effectiveness, and provide actionable insights for stronger security posture.

Exposure Remediation (ER)

Prioritize, validate, and resolve security exposures in real time. Leveraging continuous insights from testing and monitoring, our experts help organizations reduce risk and expedite remediation of critical weaknesses before they can be exploited.

Platform Integrations

Jira slack servicenow Microsoft Teams

PROVEN CLIENT OUTCOMES

Know Your Attack Surface

Complete, continuously updated visibility across assets, exposures, and risk paths.

Reduce the Signal-to-Noise Ratio

Fewer false positives, clearer findings, and expert-validated insights teams can trust.

Prioritize High-Impact Exposures

Focus remediation on what truly threatens the business, not just what shows up in a scan.

Your Wins Are Our Wins

4.8/5

G2 Customer Reviews

Creating Raving Fans

Our mission is to provide an unmatched customer experience from "the jump", our first interaction, and build a high-trust partnership with our customers along the journey.

> **"...in my role it's really important to make sure that we're getting the best return on the investment that we're spending, Evolve Security is very aware of that and puts the best personnel on the project. Absolutely recommend Evolve, largely through the breadth of services that they provide, together with the communication and account management that actually goes on."**

Mike Profit,
ATP (now Veryon), COO

VERYON

Full Offensive Security Suite of Offerings

Our team sets your organization up for success by combining a high-touch, high-tech approach across our portfolio of CTEM-oriented offerings.

Managed Services

- **Attack Surface Management & Continuous Pen Testing**
- AI Penetration Testing
- Embedded Systems
- Application Penetration Testing
- Network Penetration Testing

About Us & Our Bold Mission

Evolve Security is an offensive cybersecurity solution, delivering continuous penetration testing with the optimal blend of AI automation and human expertise, providing peace of mind through greater cyber resiliency.

Our mission is to be on the forefront of the war on cyber, building innovative, proactive offensive security solutions. At the heart of our mission is a commitment to combining elite human pentest operators with scalable technology to drive lasting impact and mature our customers' leading offensive security programs.

Commence Continuous Pentesting

Introducing Darwin Attack 3.0

Our Managed Offensive Security Solution combines the perfect blend of AI + Human-in-the-Loop intelligence to transform our team into superhuman adversarial experts, delivering ongoing pen testing from our world-class Offensive Security Operations Center (OSOC).

Darwin Attack 3.0, a supercharged platform, is powered by:

- **Risk Scoring**
  Turn cyber noise into clear, prioritized action
- **Asset & Threat Intelligence**
  Smarter asset management, clearer insights
- **Human-In-The-Loop**
  Accuracy through expert human operators
- **Dashboards & Reporting**
  Smarter asset management, clearer insights
- **Platform Integrations**
  Integrated workflows, better outcomes
