Tree Table & Bench
by John Tree

WHAT

A modular table and bench system takes inspiration from a traditional farmhouse style dining table.

WHY

To minimise material usage, both physically and visually, whilst allowing all components to be fully disassembled and repaired, reused and recycled.

HOW

Each component on every product is disassemblable and the stools, chairs and tables have been designed with transport in mind to reduce the collection's carbon footprint.

Our aim is to develop a sustainable business that meets consumer needs without compromising our future welfare. Our products can contribute to the sustainability goals of a commercial project and we are proud be able to offer FSC®certified products and use recycled metals. Where sustainable sources are quoted, and a chain of custody is required, this must be indicated on the purchase order. A chain of custody requested after an order has been placed will not be possible to recover. Figures stated in the summaries may vary based on model and options selected. Recycled calculations are taken from supplier information and industry data, as such material variables are likely to affect the figures which may result in changes to these percentages.
