### Why It Works

Hands-on experience - interactive VR content that lets users learn by doing

4 times more effective than e-learning & just as cost effective

In-depth analytics & reporting that records each user's capability

### What It Teaches

Real world scenarios that cover the big 4 manual handling topics:

- Lifting from the Ground
- Shared Lifting
- Lifting Overhead
- Pushing & Pulling

Point out three mistakes that this worker has made

### Built by Experts

Co-designed with the City of Greater Geelong Council, Manual Handling VR addresses OH&S requirements and provides a micro-credential within the HLTWHS005 course. It is ideal for:

- Local Councils
- Warehousing & Logistics
- Hospitality
- Facility Management
- Retail
- Manufacturing
- Health & Aged Care
- Construction

### Low Cost Plug & Play Solution

- ✓ 20 mins content split across the 4 critical topics
- ✓ Unlimited users with unlimited access
- ✓ In-depth user analytics & reporting
- ✓ "Before & After" survey to track VR training effectiveness
- ✓ No internet required - self-contained VR training program that doesn't need IT
