

Carbon Reduction Plan: Doccla

Supplier Name: Doccla

Publication Date: 19th January 2026

Commitment to Achieving Net Zero

Doccla is committed to achieving net zero emissions by 2045, in alignment with the NHS Greener NHS strategy and exceeding the HSE Climate Action Strategy 2023-2050 net zero target.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2023 Additional details relating to the Baseline emissions calculations: Baseline includes all Scope 1 and 2 emissions, and the required subset of Scope 3 emissions.

Emissions	Total (tCO ₂ e)
Scope 1	0
Scope 2	4.194
Scope 3 (Included Sources)	100.13
Total Emissions	104.324

Current Emissions Reporting

Reporting Year: 2025

Emissions	Total Estimate (tCO ₂ e) *
Scope 1	0.00
Scope 2	3.28
Scope 3 (Included Sources)	Upstream transportation and distribution (Cat.4): 7.90 Waste generated in operations (Cat.5): 1.60 Business travel (Cat.6): 12.80 Employee commuting (Cat.7): 27.30 Downstream transportation and distribution (Cat.9): 54.20
Total Emissions	107.08

Emission Reduction Targets

In order to continue our progress to achieving net zero, we have adopted the following carbon reduction targets:

- 25% reduction by 2025 (against baseline)
- 50% reduction by 2035
- net zero by 2045

We project that carbon emissions will decrease over the next five years to 74 tCO₂e by 2031. This is a reduction of 31%.

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2023 baseline:

- Implemented a remote-first working policy to reduce commuting emissions.
- Transitioned to energy-efficient equipment and LED lighting in core facilities.
- Established a device refurbishment and recycling program to extend product lifecycles and reduce waste.
- Alignment with the Greener NHS initiative and NHS England's net zero Supplier Roadmap.

The carbon emission reductions achieved by these schemes equate to 5.5 tCO₂e, a 5.3% reduction against the 2023 baseline, and the measures will be in effect when performing the contract.

Future Carbon Reduction Initiatives

In the future we hope to implement further measures such as:

- Requiring key suppliers to adopt science-based targets by 2027.
- Transitioning all remaining office operations to 100% renewable energy sources.
- Electrification of any necessary company logistics/fleet.

Declaration and Sign-off

This Carbon Reduction Plan has been completed in accordance with PPN 006 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by Dag Larsson, CEO/ Co Founder of Doccla.
