

Prevent leakages, even with louvers

Auto-closing hatch for electrical cabinets

This simple add-on keeps your enclosure airtight during a fire, maximizing the effectiveness of DSPA aerosol generators.

Why it matters for aerosol systems

- Louvers = potential leakage points
- Aerosol systems tolerate leaks but may require additional agent
- Auto-closing hatches seal ventilation prior & during discharge
- Helps maintain effectiveness & agent concentration

DSPA Aerosol fire protection, made simple.

- Compact solution, no cylinders or piping
- Non-pressurized, non-toxic agent
- Quick to install and retrofit
- Minimal maintenance.
