

**Too many vents?  
Here's how to keep your  
fire suppression airtight.**

# Mechanical hatches can help.

If your enclosure has ventilation louvers, this simple solution can:

- Close automatically in case of fire
- Block air vents without electronics
- Help maintain nitrogen concentration during discharge

Modular,  
pressure-free,  
built for  
scalability.

# N2 Gen Fire Suppression: designed to protect critical infrastructure.
