

**INVESTMENT OBJECTIVE**

The portfolio looks to deliver long-term capital growth with a moderately cautious approach weighed towards lower risk assets such as cash and fixed income whilst having limited exposure to higher risk assets such as equities.

**INVESTMENT STRATEGY**

The portfolio manager will invest in a diversified portfolio of assets including equities, bonds, commercial property and cash to deliver long-term returns without compromising investors' tolerance for risk.

The portfolio manager will invest in low-cost passive strategies that are designed to track the performance of indices such as the S&P 500 Index and the Barclays Global Bond Index to give exposure to a variety of asset classes across a diversified range of global markets. Our focus is on long-term minimal fee impact on the portfolio.

**PORTFOLIO RISK RATING**

Risk is based on the standard deviation of returns. Standard deviation measures the dispersion of returns around the average (i.e. volatility. High volatility does not necessarily result in higher returns).

**BENCHMARK WEIGHTINGS**

30%	S&P Global BMI
10%	S&P Global Reit
60%	Barclays Global-Aggregate TR Index
