⚡ AI-Powered Game Creation

CRAIFT

About Us

We believe that everyone has a game inside them waiting to be created. Our AI-powered platform removes the technical barriers that have traditionally kept aspiring game creators from realising their visions.

Whether you're a seasoned developer looking to prototype quickly or someone who's never written a line of code, Craift empowers you to create playable games.

Vision

Problem

Users lack a centralized platform for creating, accessing, and developing game-creation knowledge.

Solution

A cross-device, multi-game platform designed to accelerate user learning in the creation of new games.

Webinars

CRAIFT

Powerful Features

AI Game Engine

Our advanced AI understands your vision and generates complete game mechanics, logic, and systems automatically.

Describe & Create

Simply describe your game idea in plain English. No coding, no complex tools—just your imagination.

Auto-Generated Assets

AI creates stunning visuals, characters, environments, and sound effects tailored to your game's style.

CRAIFT

Powerful Features

Instant Playability

Test your game immediately in the browser. Make changes on the fly and see results in real-time. Remix your code later.

Low–High Code

Build your game using your preferred level of code, with support for major game development languages.

One-Click Publish

Deploy your game to web, mobile, or desktop platforms with a single click. Reach players everywhere.

CRAIFT

Powerful Features

Learn & Grow

Master elite game creation with our numerous tutorials, live webinars, courses and exciting challenges.

Community First

Connect with other creators, spark conversations, gain credits and certificates and join community events.

Create Games Your Way

NO-CODE
Zero Technical Skills

No-Code: Just Describe It

Simply tell AI what game you want to create. No technical skills needed - just your imagination and natural language.

AI Game Creator

Describe your game:

"Make a space shooter where I dodge asteroids and collect stars"
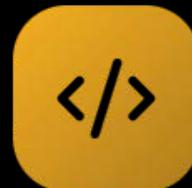

CRAIFT

Create Games Your Way

LOW-CODE
Visual Building

Low-Code: Visual Game Builder

Build games without writing code. Our intuitive drag-and-drop interface makes game creation accessible to everyone.

HIGH-CODE
Developer Power

High-Code: Full Control

For developers who want complete control. Write custom JavaScript/TypeScript code with our powerful code editor.

High-Code Editor

```
class Player {
    constructor(x, y) {
        this.x = x;
        this.y = y;
        this.speed = 5;
    }
    update() {
        // Game logic here
    }
}
```
